INTRODUCTION

The Sony Clie PEG-UX50 has a separate tilt screen mechanism that does not require the user to dismantle the battery plate in order to get to the display .

TOOLS:

- Phillips #1 Screwdriver (1)

Step 1 — Tilt Screen

- Take off the screws located on the 2 sides of the tilt screen.
- Unscrew the screw located at the tilt base of the screen

Step 2

- Gently remove back plate of tilt screen by sliding upward.

⚠ With caution, lift wires from the track in the back plate

Step 3

- Disconnect the thin bus cable attached to the Integrated Circuit

Step 4

- Detach the plastic black frame from in between the plate and lcd.

⚠ Do not disconnect the display from the board yet.

Step 5

- Disconnect the thin connector from the face plate using the tweezer

Step 6

- With your hands, quick-release and disconnect the thick cable

To reassemble your device, follow these instructions in reverse order.
