## INTRODUCTION

This guide is used for taking apart the case to fix many of the issues of the Sony Cybershot DSC-P52.

### TOOLS:

- [Phillips #0 Screwdriver](#) (1)
-

## Step 1 — Outer Case

- Open the battery compartment and remove the batteries.
- Remove all of the visible screws on the outside of the case.
- ① There should be three of them that are all easily located.

## Step 2

- Open the memory card compartment.
- Remove the screw next to the memory card slot.

## Step 3

- Pull apart the front and back cover pieces carefully.
- ① The front cover should come completely free with little effort.
- ① The back cover will still be attached to the circuit board.

## Step 4

- Simultaneously unclip all of the clips holding in the circuitry. Remove the back case.
- ① The circuitry will still be connected to the back case by ribbon cables.

## Step 5

- Open the case as shown.

## Step 6

- Unclip the clip holding the ribbon cable in.
- ⓘ Other ribbon cables might not have a clips.

## Step 7

- Pull the ribbon cable out.

To reassemble your device, follow these instructions in reverse order.
