---

## INTRODUCTION

This guide will teach you how to replace the Sony Cyber-shot DSC-W290's LCD screen.

---

### TOOLS:

- [Phillips #0 Screwdriver](#) (1)
  - [Tweezers](#) (1)
-

## Step 1 — Battery

- Find the hatch labeled "open" on the left side of the bottom of the camera.
- Slide the hatch in the direction that the arrow is pointing. The hatch will open outward on its own.

## Step 2

- Slide the blue locking tab to release the battery.
- Slide the battery out of the camera.

### Step 3 — Outer Casing

- Replace hatch and rotate camera 180 degrees. You should still be looking at the bottom of the camera.
- Remove the four 2.5mm Phillips #0 screws.

### Step 4

- Turn the camera so the left side-panel reading "5x Optical Zoom" faces you.
- Remove the two 2.5mm Phillips #0 screws.
- ⓘ You may have to remove the screws with a pair of tweezers when the screws are almost out.

## Step 5

- Turn the camera so the right side faces you.
- Remove the two 2.5mm Phillips #0 screws.
- ⓘ You may have to remove the screws with a pair of tweezers when the screws are almost out.

## Step 6

- Rotate camera so that the back is facing you.
- Pull the back casing directly away from the LCD screen.

## Step 7

- Turn the camera so that the left side is facing you.
- Pull the left side-panel off of the camera.

## Step 8

- Turn camera so that the front of the camera is facing you.
- Pull the front casing directly away from the camera.
- ⓘ The right side panel may fall off when you take the front panel off.

## Step 9

- Turn the camera so that the right side is facing you.
- Pull the right side-panel away from the rest of the camera.

## Step 10

- This is what your camera should look like now that you have removed the casing from all sides.

## Step 11 — LCD Assembly

- Gently pull the LCD and its casing away from the motherboard as shown.
- ⓘ Be careful not to rip out any ribbon cables.

## Step 12

- Disconnect the small ribbon-wire by gently pulling on the small ribbon-wire where it connects with the motherboard.

⚠ Do *not* use excessive force to remove the wire because this may cause it to tear.

## Step 13

- Disconnect the large ribbon-wire by pulling on the large ribbon-wire where it connects to the motherboard.

## Step 14

- Pull the LCD and its casing away from the rest of the camera.

To reassemble your device, follow these instructions in reverse order.
