 **TOOLS:**

- Phillips #000 Screwdriver (1)

Step 1 — Front Case

- Remove the rightmost screw on the bottom of the camera with the screwdriver.
- Remove the bottom left screw with the screwdriver.
- Remove the top left screw with the screwdriver.

Step 2

- Flip the camera over to expose its right side.
- Remove the screw with the screwdriver.

Step 3

- Flip the camera to expose the left side with the wrist strap.
- Remove the top screw with the screwdriver.
- Remove the bottom screw with the screwdriver.

Step 4

- Lift the side panel of the camera up to release the front case.

Step 5

- Lift the front case up gently to remove it completely.

To reassemble your device, follow these instructions in reverse order.
