

Sony Ericsson W300i Camera Replacement

How to replace the camera in the Sony Ericsson W300i cell phone.

Written By: Laura Inbody

 **TOOLS:**

- [T6 Torx Screwdriver \(1\)](#)
- [iFixit Opening Tools \(1\)](#)

Step 1 — Camera

- The tools you will need for this step is the prying tool and the T6 Torx screwdriver.

Step 2

- Remove the back cover of the phone by pushing downwards with your thumbs.

Step 3

- Now, remove the battery from the phone by gently prying the battery out.

Step 4

- Remove the front plate from the phone by using the prying tool.

Step 5

- You now have access to the fours screws that hold the front of the phone together. Remove the four screws.

Step 6

- Use the prying tool to separate the two parts of the top of the phone

Step 7

- Use your fingers to remove the screen and unplug the ribbon cable from the bottom right corner of the back of the screen.

Step 8

- Now you have access to the camera, which is the silver plate at the bottom of the phone. Remove the camera and replace with a new camera.

To reassemble your device, follow these instructions in reverse order.
