

# Sony Ericsson W810I Camera Lens Replacement

Written By: Ben Micucci

## INTRODUCTION

This guide will show the user how to replace the Camera Lens

### TOOLS:

- [Phillips #00 Screwdriver](#) (1)
- [T6 Torx Screwdriver](#) (1)
- [T7 Torx Screwdriver](#) (1)
- [iFixit Opening Tools](#) (1)

## Step 1 — Camera Lens

- Ensure the phone is switched off. Then press down firmly against the Cingular icon with your thumb.
- Slide the panel down and remove the latch

## Step 2

- Lift the battery with your fingers and pull it out of the casing.
- Remove the SIM card as well if you have one

## Step 3

- Remove the two outer screws using a T7 Torx screwdriver.

## Step 4

- Remove the two smaller inner screws with the Mini-Phillips screwdriver.

## Step 5

- Remove the back faceplate on the camera side with the blue hand wedge.

## Step 6

- Flip the phone over and pry off the front faceplate using multiple blue hand-wedges.
- Separate the keypad from the logic board by turning it upside down and allowing it to fall into your hand.

## Step 7

- Remove the two remaining screws at the top corners of the phone.

## Step 8

- Remove the logic board with multiple blue hand-wedges. Prise the logic board away carefully to avoid damaging it or snapping the wiring.

## Step 9

- From the inside of the panel, press down on the camera lens to pop it out of its mounting.
- Replace the lens and reverse the process to reassemble the device.

To reassemble your device, follow these instructions in reverse order.
