Step 11

- Slide the metal frame across revealing the last screw . Make sure to keep the plastic cover after removing the screw

- Disconnect the digitizer cable

Step 12

- Insert a plastic spudger around the edge of the frame and take the lcd assembely from the glass

- Using a heat gun heat around the edges of the glass to soften the glue, and use your prying tool between the glass and the frame to take the glass off.

To reassemble your device, follow these instructions in reverse order.
