

# Sony Ericsson xPeria Active Speaker Replacement

This guide will take you through the process of replacing the speaker of your phone.

Written By: Daniel

## INTRODUCTION

The speaker of a phone can go bad for a number of reasons. The most common reason for a faulty speaker is water damage. However, a speaker may go bad due to a faulty connection or faulty manufacturing.

### TOOLS:

- [iFixit Opening Tools](#) (1)
- [T5 Torx Screwdriver](#) (1)
- [T6 Torx Screwdriver](#) (1)

## Step 1 — Remove the back cover.

- Open the flaps and remove the back cover using the plastic opening device.

## Step 2 — Remove inside plastic battery cover.

- Remove the battery shield with the plastic opening device.

## Step 3 — Remove the battery

- Remove the battery.

## Step 4 — Unfastening The Motherboard Cover

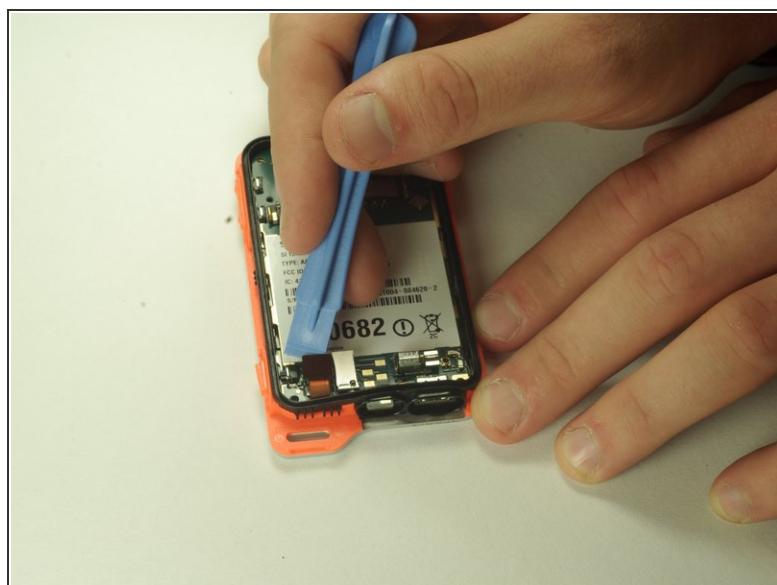

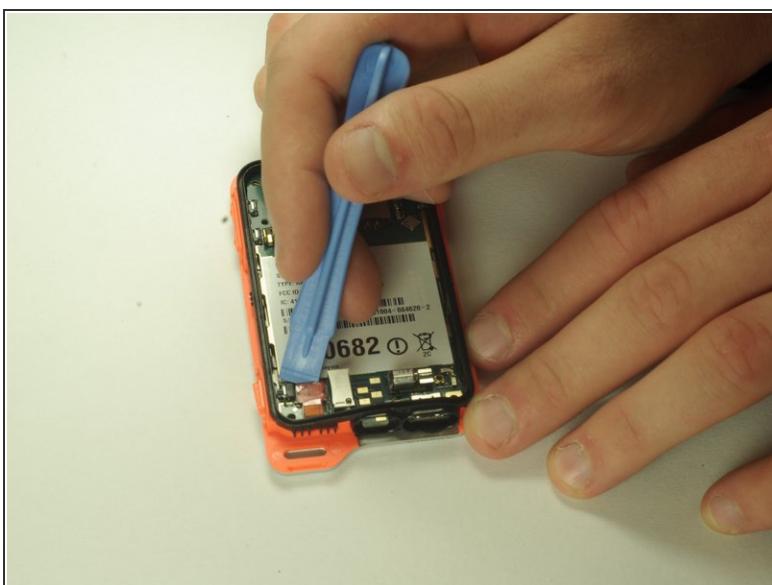

- Unscrew the 5mm screws with the T5 head.
- Unscrew the 6mm screw with the T6 head.

## Step 5 — Removing The Motherboard Cover

- Remove the black cover with the plastic opening tool.
- Remove the headphone jack from its slot.

## Step 6 — Speaker

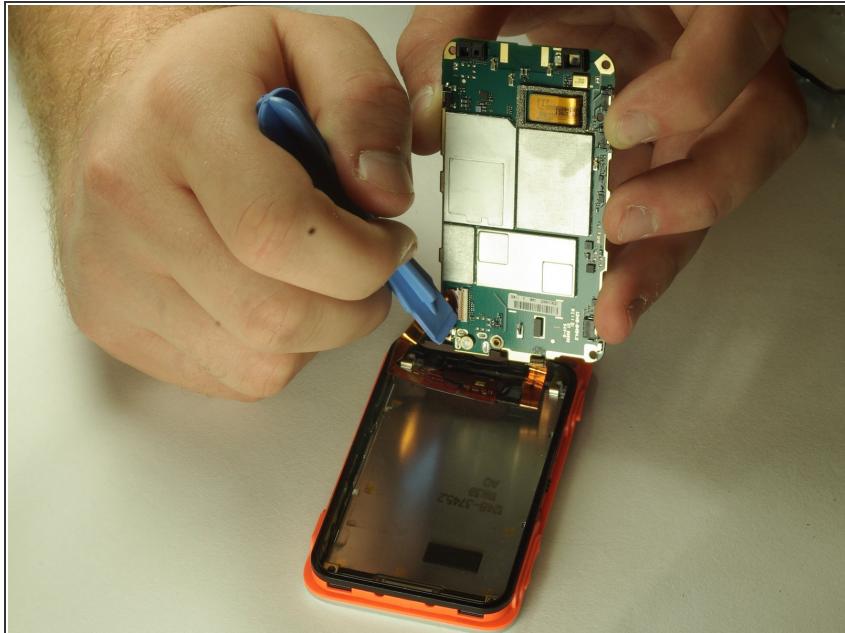

- Carefully pry the power cable away from the motherboard.

## Step 7

- Pry the motherboard out of the case.

## Step 8

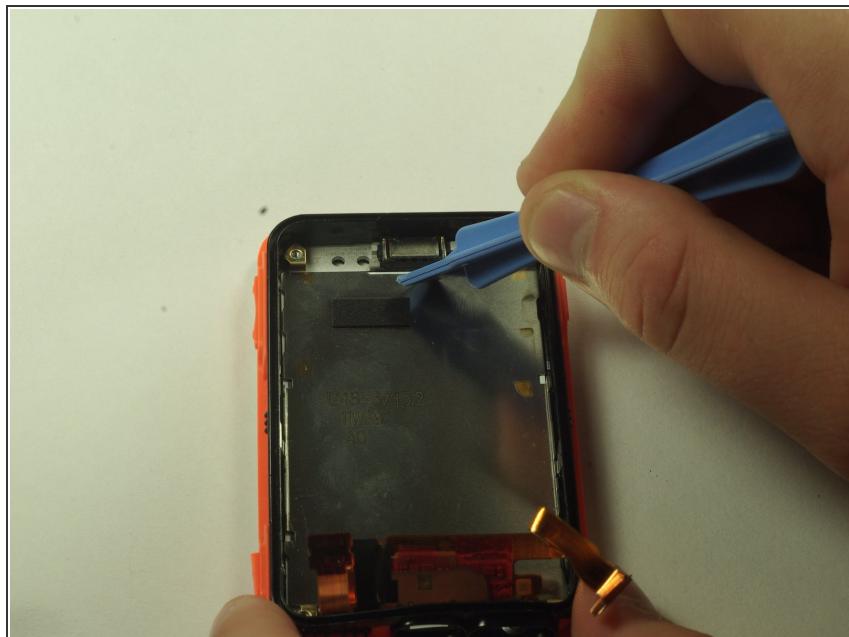

- Remove the power cable from the backside of the motherboard.

## Step 9

- The speaker can be seen in the top middle area on the reverse of the screen.

## Step 10

- Use the plastic opening tool to carefully pry the speaker away from the phone.

To reassemble your device, follow these instructions in reverse order.
