## INTRODUCTION

If you find that your laptop no longer connects to a Wi-Fi connection. It may be time to replace the wireless network card.

### TOOLS:

- [Phillips #0 Screwdriver \(1\)](#)
- [iFixit Opening Tools \(1\)](#)

## Step 1 — Wireless Network Card

- Remove the twelve 5 mm Phillips #0 screws from the bottom of the laptop.

## Step 2

- Remove the two 5 mm Phillips #0 screws from the bottom of the laptop.

## Step 3

- Using the plastic prying tools, go around the edge of the bottom of the laptop to release the cover.

## Step 4

- Disconnect the black and white antenna wires from the wifi card.
- Make sure to lift the plugs straight up from the sockets and not from an angle.

## Step 5

- Remove the 3 mm Phillips #0 screw from the wifi card.
- Remove the card from its socket.

To reassemble your device, follow these instructions in reverse order.
