Step 1 — Keyboard

● Take out the screw in the center of the computer.

Step 2

● Flip the computer right side up.
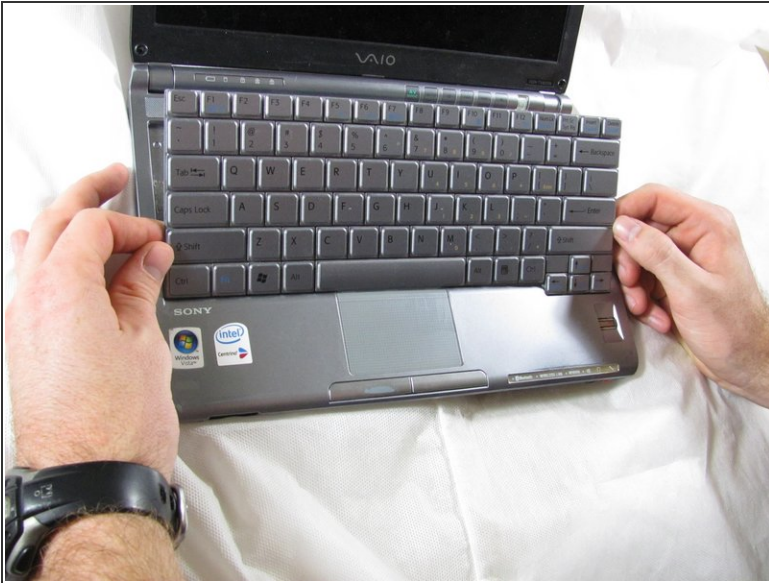

● Open screen so that keyboard is visible.

Step 3

- Use a plastic opening tool to gently lift the keyboard at a corner.

⚠️ Make sure you get below the keyboard itself and not just the keys.

- Slide the tool around the perimeter of the keyboard and it will start to lift.

Step 4

⚠️ Do not pull the keyboard away from the computer. There is a ribbon cord attaching the keyboard to the computer.

● Once the keyboard has been lifted at a few edges, lift the keyboard with both hands.

Step 5

● Locate the ribbon cord behind the keyboard.

● Locate a brown clamp attaching the keyboard to the computer.

● Use a plastic opening tool to lift the clamp and release the cable.

ⓘ Now the keyboard can be pulled away entirely.
