Step 1 — Bottom Cover

- Remove cover for the extended battery connector. Use your finger nail or a plastic opening tool to remove it.

- Remove the two rubber feet at the back of the computer, these can be removed in the same way.
Step 2

- Remove the four 5.6mm Philips #00 screws located at the top of the computer.

- Remove the eight 3.6mm Philips #00 screws on the base of the computer.

Step 3

- Using a plastic opening tool, pry the plastic casing away from the base of the computer, the remaining clips around the edges can be released using your hands.

- (i) Leave the side with the USB and audio port until last, then slide the case out and off, so the audio port doesn't get caught.

Step 4 — Solid State Drive

- Remove the 4mm #0 Philips screw holding down the SSD

- Lift the SSD up and slide out of the slot
