Step 1 — Battery

- Carefully grab the edges of the laptop and flip it over to reveal the back panel.
- The battery is located on the lower half of the back panel, and contains three 10mm flat-head screws.
- Unscrew the three 10mm flat-head screws using a flat-head screw driver.
- Lift the battery from the lip closest to the middle screw to remove the battery entirely.

To reassemble your device, follow these instructions in reverse order.
