## TOOLS:

- [Phillips #00 Screwdriver](#) (1)
- [iFixit Opening Tools](#) (1)
- [Spudger](#) (1)

## Step 1 — Removing the back cover

- Remove the two black 6.4mm Phillips screws from the back of the device.

## Step 2

- Using a plastic opening tool, work your way around the edges of the device, carefully prying off the front panel.

### Step 3

- Remove the two 2.8 mm Phillips screws located on either side of the device near the top.

### Step 4

- Carefully pull the top piece away from the device.

## Step 5 — Removing the Bluetooth module

- Use the flat end of the spudger to flip up the retaining flap for the bluetooth module.

⚠ Be sure to lift up on the retaining flap, and not the socket itself.

## Step 6

- Remove the two 1.8mm silver Phillips screws on the Bluetooth module.
- Lift up on and remove the Bluetooth module.
- ⓘ The ribbon cable must first be removed in order to access the highlighted screw.

To reassemble your device, follow these instructions in reverse order.
