Step 1 — Back Cover

- Heat along the edges of the back cover using a heat gun to soften the glue.

Step 2

- Attach the small suction cup to the back cover near the bottom of the phone.

- Pull up on the suction cup and insert the plastic opening tool in between the back cover and the rest of the phone.

Step 3

- Move the spudger around the edge of the back cover to separate it from the black adhesive.

- ⓘ Separating the back cover from the rest of the phone ruins the adhesive which makes it no longer waterproof.

To reassemble your device, follow these instructions in reverse order.
