Step 1 — Heat the cover glue

- Heat up along the edges of the cover to soften the glue.
  - (i) Ideal temperature is around 120 - 150 °C for 60 seconds.

Step 2

- Place a suction cup on the back cover and pull to open a gap.

- Insert a guitar pick into the gap and slide it around the corner of the back cover to cut the adhesive sticker.

Step 3

- Finally, remove the back cover.
  - Be careful, the back cover is fragile and can break.
  - It can be a good idea to wear protective glasses. If the glass shatters, it could enter your eye.

To reassemble your device, follow these instructions in reverse order.
