

Spin Master Hatchimal Draggles Fur Replacement

Removing the fur from the Spin Master Hatchimal Draggles for cleaning or replacement.

Written By: Kimberly Searles

INTRODUCTION

Toys go through a lot, and many times they get dirty. This guide will show you how to remove the fur for further cleaning or full replacement.

TOOLS:

- [iFixit Opening Tools](#) (1)
 - [Utility Scissors](#) (1)
 - [Spudger](#) (1)
 - [Phillips #00 Screwdriver](#) (1)
-

Step 1 — Plastic Wing Replacement

- lay the Hatchimal on its side.

Step 2

- Using the plastic opening tool, push in on the purple clip.

Step 3

- Pull the wing off of the hatchimal.
- ⓘ The wing should come off with little resistance.

Step 4 — Fur Replacement

- Cut the fur retaining zip-tie with a pair of scissors.

Step 5

- Lift the fur up until it can't go further.

Step 6

- Use the spudger tool to push up on the black clip to free it.
- Pull the clip out.

Step 7

- Lift fur up to reveal the next set of clips.
- Insert a spudger to push up on the black clip to free it.
- Pull out the clip.

Step 8

- Lift the fur up and over the Hatchimals Head.
- Remove the six 12mm Phillips #00 screws from then body.

Step 9

- Pull the casing apart.
- Remove the yellow speaker cable.

Step 10

- Remove the three 7mm Phillips #00 screws from the head.
- Remove the wheel base and the circuit board carefully not to damage the spring.

Step 11

- Push the six black fur clips out using the spudger.
- Remove the fur completely.

To reassemble your device, follow these instructions in reverse order.
