-

## Step 1 — Pickups

- With a screwdriver, unscrew the back panel screws.
- Remove back panel.

## Step 2

- Unwind and remove the guitar strings.

### Step 3

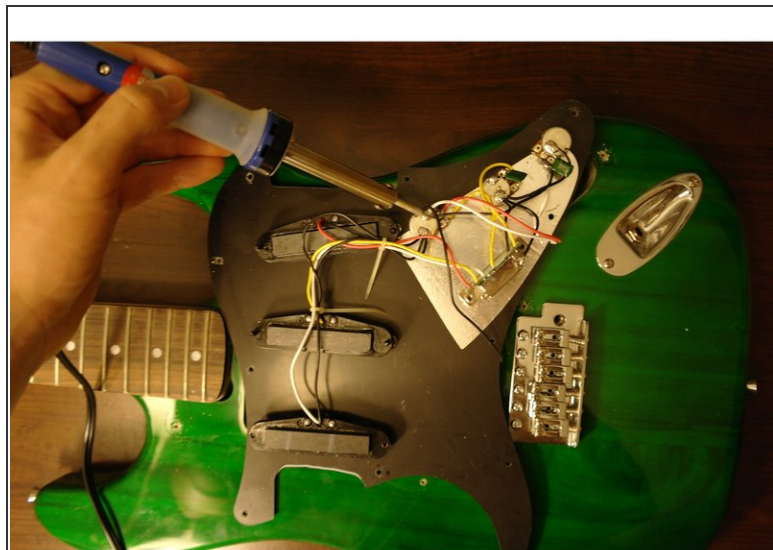

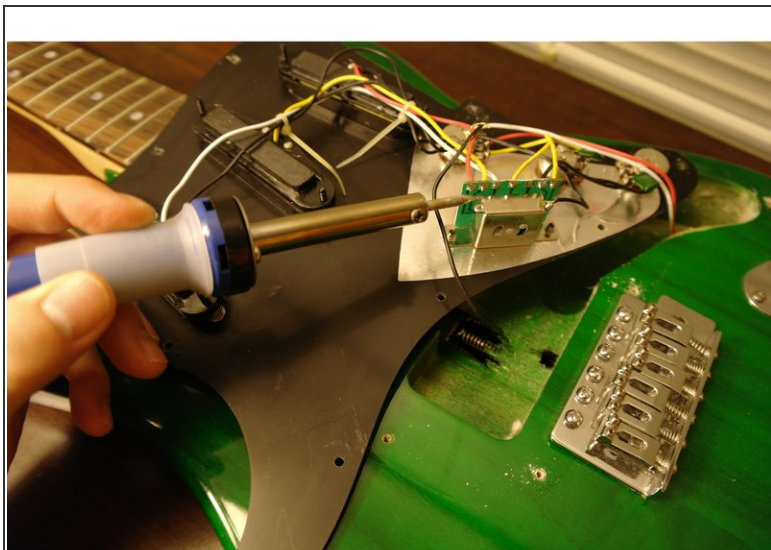

- With a screwdriver, remove the front body perimeter screws.

### Step 4

- Carefully lift the panel of the guitar and turn it upside down to reveal the electronic components.

## Step 5

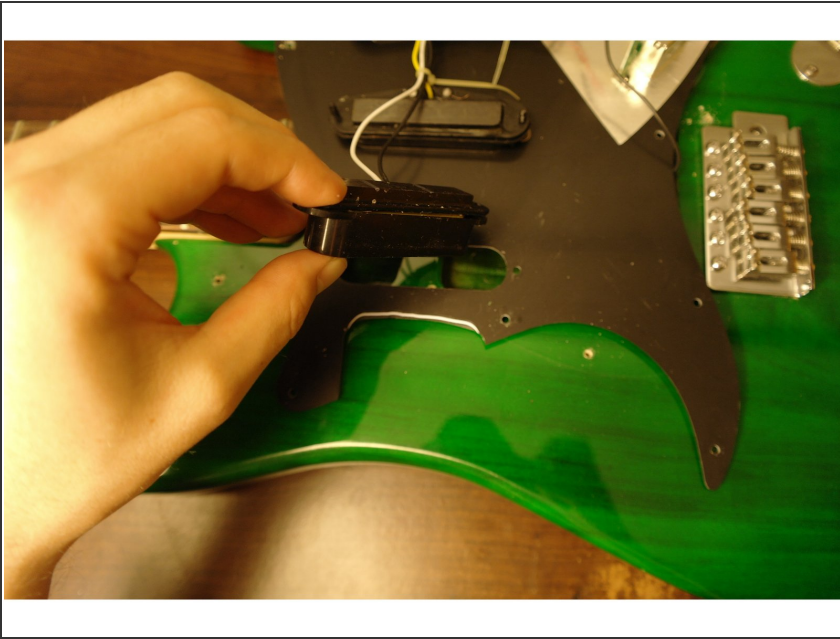

- Using the the soldering iron and the solder sucker (or the soldering wick), take away any soldering connections of the potentiometers and the five-way switch.

## Step 6

- Carefully flip the back panel to the original position.
- With a screwdriver, unscrew the pickups.

## Step 7

- Remove the old pickups.

To reassemble your device, follow these instructions in reverse order.
