## INTRODUCTION

If your pencil sharpener will not power on, there may be an issue with the power cord. See our [troubleshooting guide](#) for more information on this problem. If your power cord turns out to be the problem, then follow these steps to replace it.

### TOOLS:

- [Phillips #00 Screwdriver](#) (1)
- [Utility Knife](#) (1)

## Step 1 — Cover

- Pull out the shavings tray from the pencil sharpener.

 Beware of loose pencil shavings falling on your workspace.

## Step 2

- Turn the pencil sharpener on its side.

## Step 3

- Using a Phillips00 screwdriver, remove the two front 11.6mm screws.
- Using the plastic opening tool, remove the back plastic feet.
- After removing the back plastic feet, using a Phillips 00 screwdriver, remove the two back 11.6mm screws.

**i** The hole is deeper than you may think. It may take some time to get the screwdriver to click in.

## Step 4

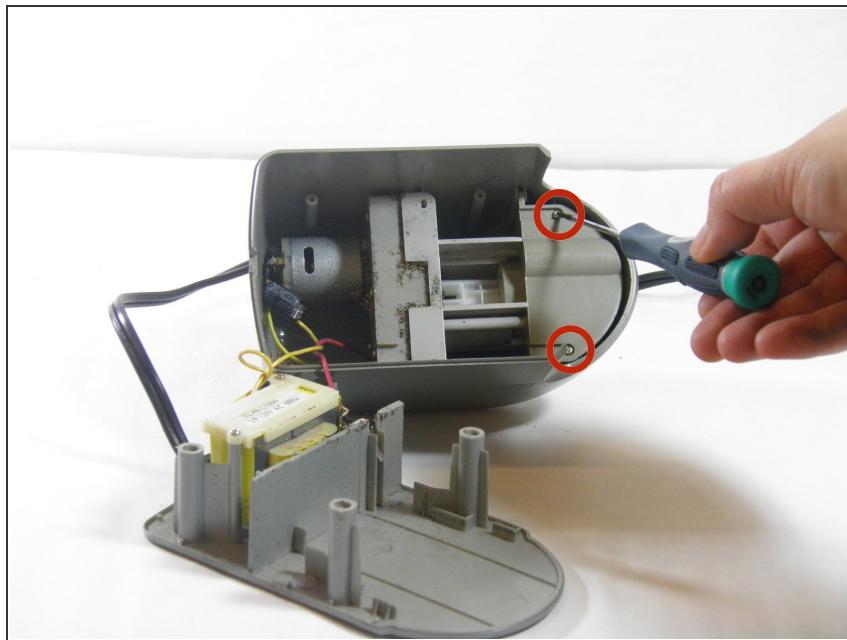

- Carefully pull apart the bottom panel from the top panel.

**!** Be careful not to pull too forcefully as the panels are connected by wires.

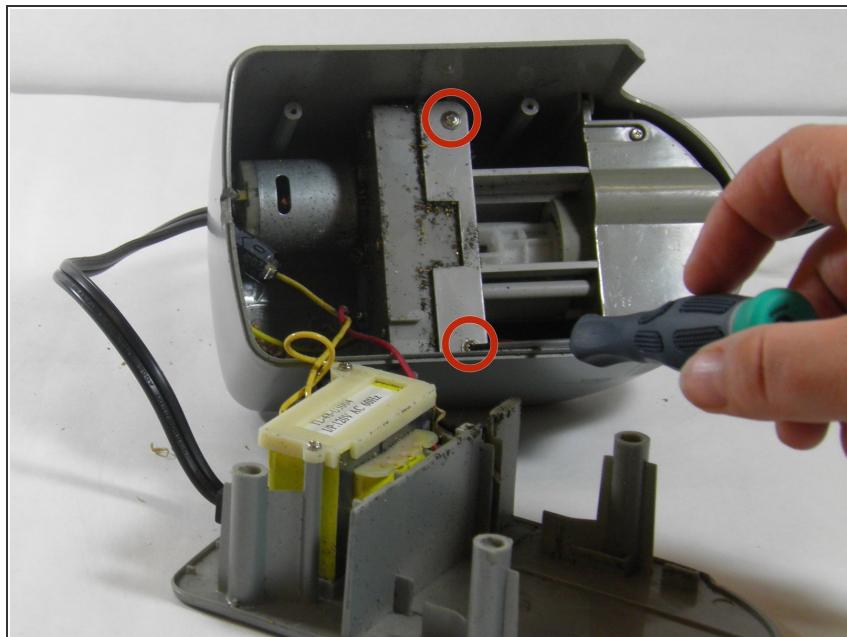

**!** Beware of pencil shavings falling out onto your workspace.

## Step 5

- Using a Phillips00 screwdriver, remove two 8.9mm flat edge screws from the top section of the top panel.

## Step 6

- Using a Phillips00 screwdriver, remove two 10.3mm screws from the middle section of the top panel.

## Step 7

- Carefully pull the cover from the top panel and set it aside.

## Step 8 — Power Cord

- Orient the panel with the power cord so that it is facing you.
- Using a Phillips00 screwdriver, remove the two flat head 8.95mm screws securing the cord.

## Step 9

- Using a Phillips#0 screwdriver, remove the two 10.42mm screws on the plastic frame securing the power component.

## Step 10

- Carefully lift out the power component from the panel.

## Step 11

- Use a utility knife to cut the black insulation tape from the wire.
- Cut the power cord from the wires to remove it.

To reassemble your device, follow these instructions in reverse order.
