INTRODUCTION

This guide will walk you through the necessary steps for replacing the battery pack in your Toshiba Satelite E45W-C4200X.

The battery is a vital piece of hardware that allows the laptop to run when not plugged in. A defective battery can prevent the laptop from turning on and can result in longer charging times or short battery life.

Before using this guide, make sure to review the [troubleshooting page](#) oftentimes, the battery can be fixed without replacing it.

Make sure to power off your laptop completely and disconnect from any external power source prior to beginning the process.

TOOLS:

- Phillips #1 Screwdriver (1)
- iFixit Opening Tools (1)

PARTS:

- Toshiba Satellite E45W-C4200X battery (1)

Step 1 — Battery

- Remove the ten 1 mm screws that secure the back cover using a Phillips #1 screwdriver.

Step 2

- Use plastic opening tool to separate the back cover from the laptop.
 - ⚠ Go slowly and be careful as the plastic can crack.
 - ⓘ It is recommended that you start from a corner and run the tool along the edge.
- Lift and remove the casing.

Step 3

- Gently lift the flap covering the top side of the battery.

Step 4

- Remove the four 0.5 mm screws that hold the battery in using the Phillips #1 screwdriver.

Step 5

- Unplug the battery from the motherboard.

Step 6

- Remove the battery from the laptop.

To reassemble your device, follow these instructions in reverse order.
