Step 1 — Back Cover

- With the tablet turned off, remove the two 5mm Phillips head screws from the top of the tablet.

⚠️ These screws are extremely easy to lose. Be sure to store them in a safe place.

Step 2

- Use a 1 cm wide plastic opening tool to remove the back panel. Go around the entire back panel to ensure safe removal.

- The power, return, and volume buttons are not firmly secured to the panel; it is likely they will fall off in the process of removing the panel.

To reassemble your device, follow these instructions in reverse order.
