

# Teenage Engineering OP-Z Back Cover Replacement

How to open the OP-Z and replace the back cover.

Written By: Tobias Isakeit

# INTRODUCTION

Use this guide to open the OP-Z and replace the back cover.

## Step 1 — Back Cover

- Unlock the four rubber feet by turning them 90° counterclockwise using your thumb or finger tip.
- ❗ There is a tiny mark on every foot facing the bottom edge of the OP-Z. After turning them they should face towards the short edge where the on/off switch is.

## Step 2

- When turning the OP-Z over again the bottom plate should come off by itself (thanks gravity).
- ❗ If the bottom plate won't come off you might want to make sure every foot is rotated correctly and gently tug on one of them.

## Step 3

- Remove the bottom plate including the rubber feet.

To reassemble your device, follow these instructions in reverse order.
