

The Beatles Rock Band Drum Set Foot Pedal Replacement

This guide will demonstrate how to replace the foot pedal on the Rock Band Drum Set

Written By: Zach Richter

INTRODUCTION

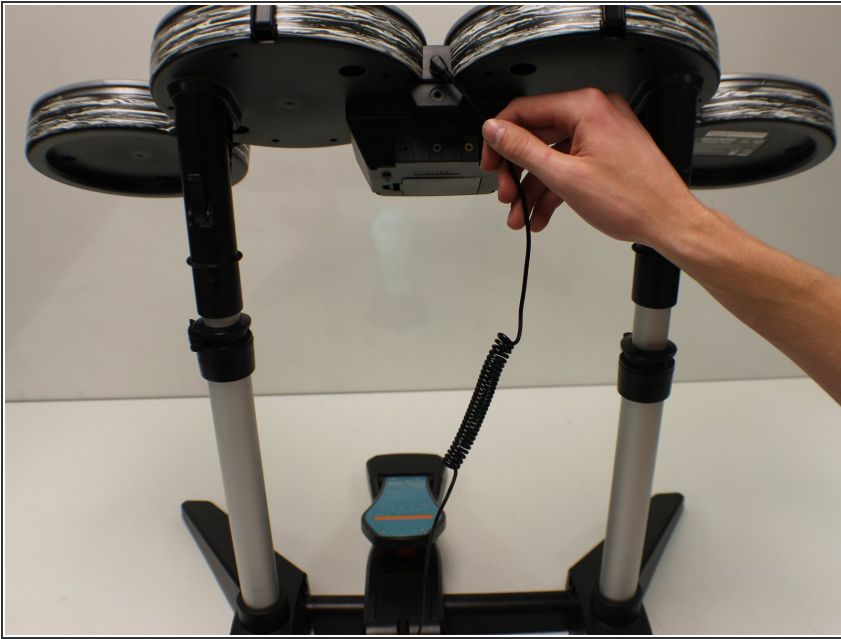

In this repair guide, we will be showing you how to determine whether or not you will need to buy a new foot pedal replacement for your drum set. Be prepared to unscrew some of the screws on the foot pedal and make sure to keep those screws somewhere safe as you continue following the steps. Keep in mind that you may need to acquire a new foot pedal if need be.

TOOLS:

- [JIS #0 Screwdriver](#) (1)
-

Step 1 — Foot Pedal

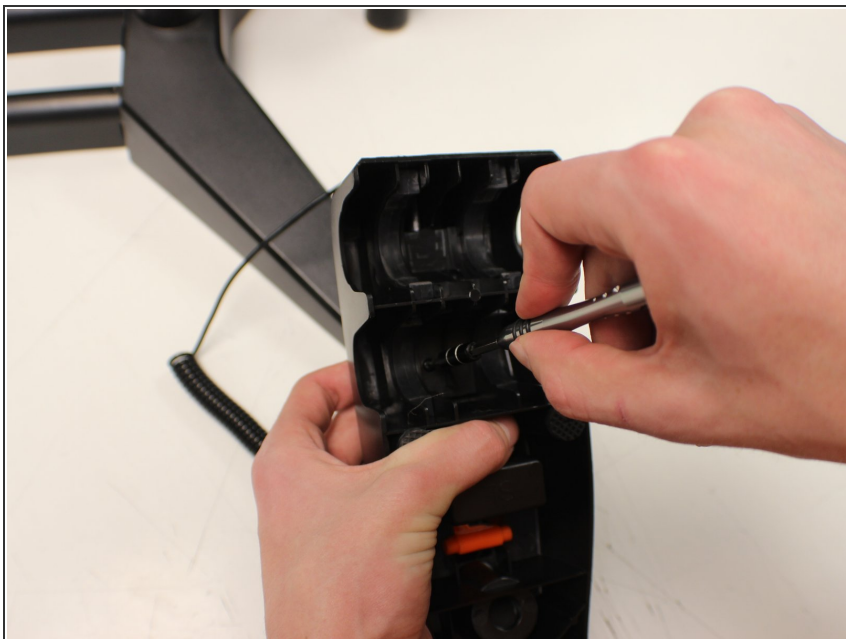

- Unplug the coiled wire from back of upper assembly.

Step 2

- Remove foot pedal from base assembly.

Step 3

- Remove the two Phillips size J0 screws holding the cover plate on the top of the foot pedal.

Step 4

- If this small sensor is broken, it is time to buy a new foot pedal and replace the broken one.

To reassemble your device, follow these instructions in reverse order.
