

The Beatles Rock Band Hofner Bass Fret Buttons Replacement

This guide will describe how to replace the fret buttons on the guitar.

Written By: Jacob

INTRODUCTION

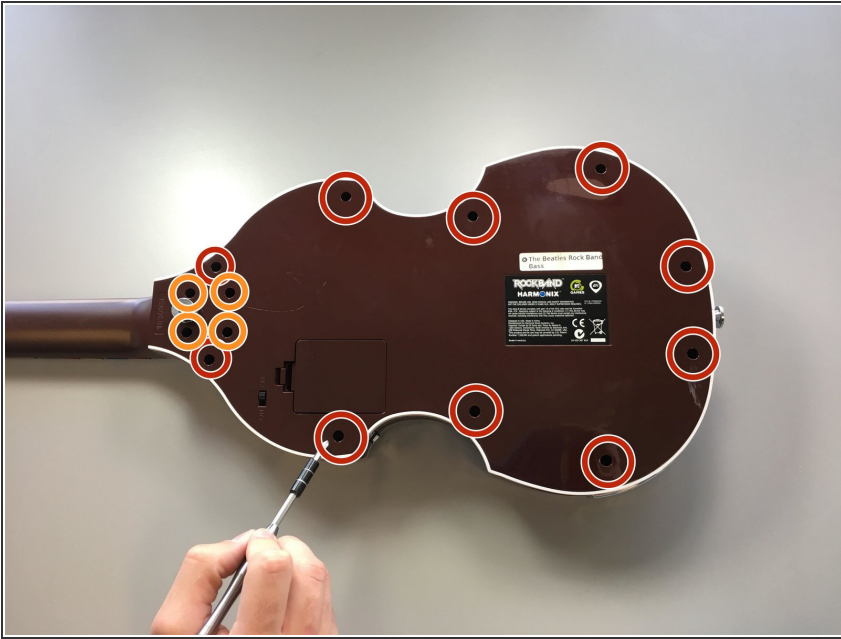

This guide demonstrates how to replace the fret buttons on a Rock Band Beatles Hofner Bass.

TOOLS:

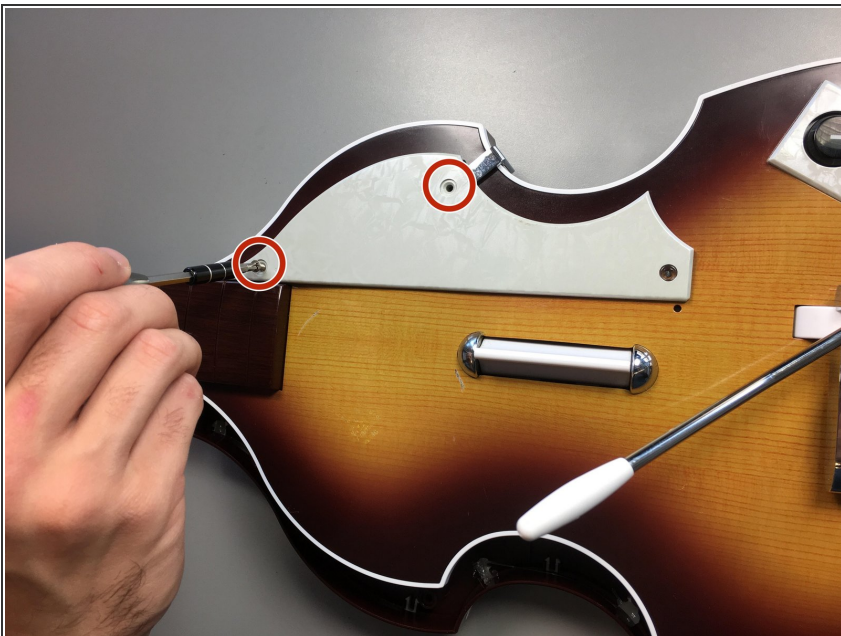

- [JIS Driver Set](#) (1)
-

Step 1 — Fret Buttons

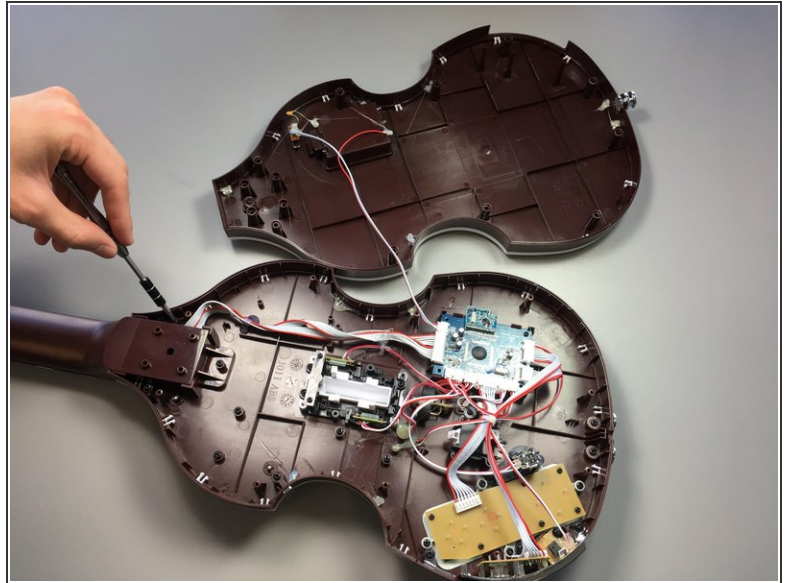

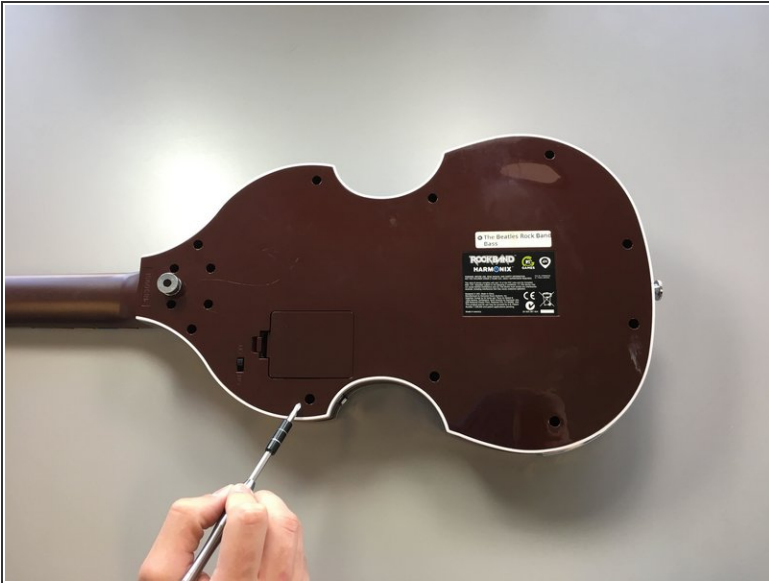

- Flip the guitar onto its backside, so that the strummer is facing the table and the battery compartment is facing you.
- Use a J1 Phillips head screwdriver to remove ten 5mm short screws.
- Use a J1 Phillips head screwdriver to remove four 5mm long screws.

Step 2

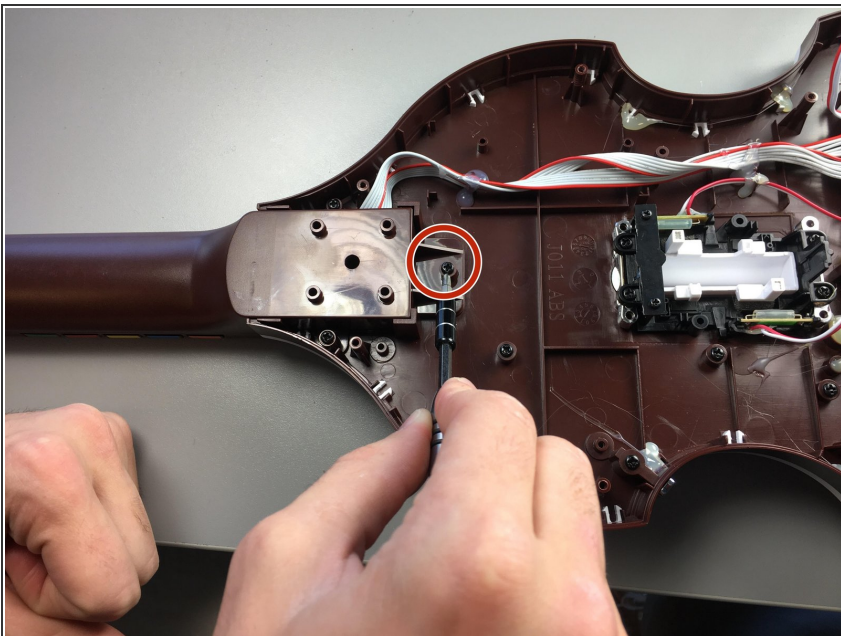

- Flip the guitar to the front, with the strummer and fret buttons facing you.
- Use a J1 Phillips head screwdriver to remove two 10mm silver, short screws.

Step 3

- Flip the guitar on its back again, so that the strummer is facing down and the battery compartment is facing you.
- Pull off the back whole panel so that the guitar is now open.

Step 4

- Using a J1 Phillips screwdriver, unscrew the 10mm screw at the base of the neck.

Step 5

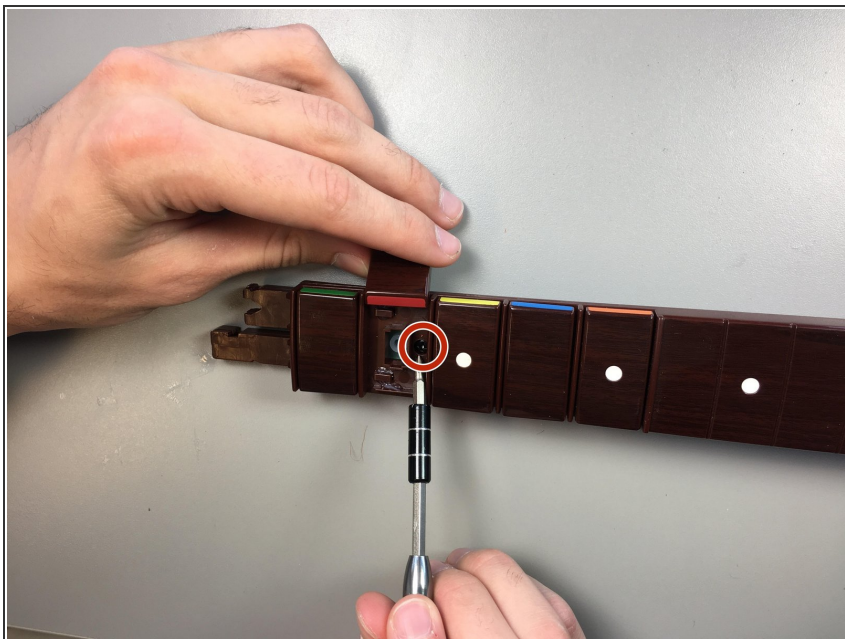

- Remove the head of the guitar, at the top of the neck. Do this by simply pulling on it, it should slide off out fairly easily.

Step 6

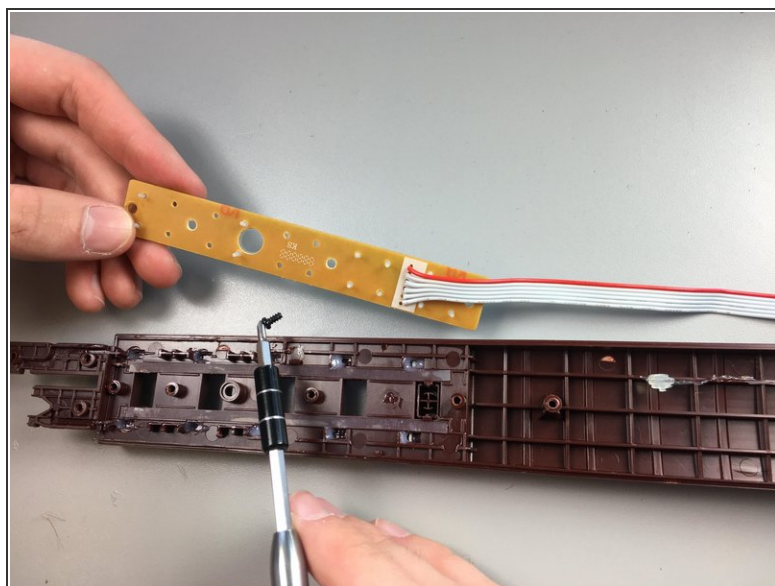

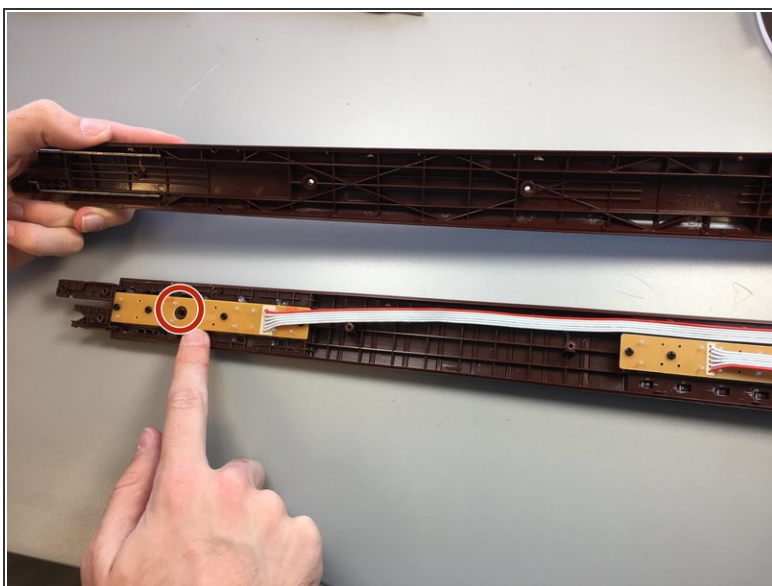

- Use a J1 Phillips screwdriver to remove three silver 10mm screws at the top of the neck.

Step 7

- Pop off the red button at the top by prying.
- Use a J1 Phillips screwdriver to remove the 10mm screw underneath.

Step 8

- Remove the 10mm screw on the fret buttons with a J1 Phillips screwdriver.
- Remove the fret buttons.

To reassemble your device, follow these instructions in reverse order.
