

# The Pave Parisien Speaker: Battery replacement

Written By: Le Pavé Parisien

## INTRODUCTION

This tutorial will help you replace the battery of your Pave Parisien

## Step 1 — Remove the grille

- Remove the protective grille by lifting one of the four corners.

## Step 2 — Opening the speaker

- Remove the four screws using a m4 allen wrench

## Step 3 — Disconnecting the speaker

- Pull the speaker out a bit to access the connectors
- With light gentle movements, pull and disconnect the two cables from the connections

## Step 4 — Pulling the board out of the case

- Pull the speaker completely out of the recessed compartment
- Gently pull the board behind the speaker out and place on a flat surface

## Step 5 — Disconnecting the battery

- Disconnect the battery connector from the board
- Be careful to pull gently using a small screwdriver to pry up the clip, then apply gentle pressure

## Step 6 — Removing the battery

- Push the battery from the rear towards the opening where the wires are
- The battery is out and now it can be changed

## Step 7 — Connecting the new battery

- Pass the connector through the space that is indicated for it

## Step 8 — Reinstalling the board

- The texture of this surface is different from the other three faces. Orient yourself to how it fits correctly.

## Step 9 — Reinstalling the speaker

- First connect the positive and negative wires, then slide the speaker in the enclosure in the right orientation

## Step 10 — Finished

- Finally replace the speaker grill: your Pave Parisien is ready to use!
