

# The refrigerator will not cool sufficiently

Replace the evaporator fan and flash (upgrade) the controller microcode

Written By: Michael Williams

## INTRODUCTION

Contact GE Customer relations and ask for part #WR49X25197 . They will send a new evaporator fan and a small box that will easily allow you to upgrade the microcode

### TOOLS:

- [Phillips 2 Screwdriver, 1/4" drive socket set](#) (1)

### PARTS:

- [part #WR49X25197](#) (1)

## Step 1 — Contact GE 800 432 2737

- Insert wisdom here.

## Step 2 — With parts in hand watch this video which shows how to do this

- Insert wisdom here.- <https://www.youtube.com/watch?v=EqylQnRZ...>

### Step 3 — Follow instructions for installing microcode

- RJ 45 plugs into a receptacle on the top of of the unit. It is towards the front.

### Step 4 — Send back microcode installation module

- Insert wisdom here.

To reassemble your device, follow these instructions in reverse order.
