Step 1 — Screws

- Remove the nine Phillips screws using a Philips 00 screwdriver
Step 2 — Prying

- Pry up the case carefully using a spudger.

⚠️ Make sure to not push the spudger in too far, as this could result in internal damage
Step 3 — Lift off cover

- Lift off the cover, and you're done!

Step 4 — Removing the screw

- Remove the one and only Phillips screw with a Phillips 0 screwdriver.

Step 5 — Lift

- Carefully lift the battery. There is a small bit of adhesive underneath the green.

⚠ Make sure to not bend the battery! This can result in a violent explosion with flames and shrapnel!

Step 6 — Connecter

- Carefully pull the connector out from underneath the logic board to remove the battery.

To reassemble your device, follow these instructions in reverse order.
