

TomTom GO Live 1535M Battery Replacement

In this guide we will disassemble the device to remove the battery.

Written By: Mathias Sagide

 **TOOLS:**

- [64 Bit Driver Kit \(1\)](#)
- [Phillips #00 Screwdriver \(1\)](#)
- [iFixit Opening Tools \(1\)](#)
- [Tweezers \(1\)](#)

Step 1 — Screen

- Slip a small opening tool underneath the screen, gently sliding it around the outside edge.
- (i)* It may be easier to start at the corners.

Step 2 — Cables

- Carefully remove the reset button cable (located on the left) and the ribbon cable.
- Remove the screen and set it aside.

Step 3 — Logic Board Cables

- Remove the logic board cables.

⚠ We highly advice that a pair of tweezers are used for this step to ensure no part is damaged.

Step 4 — Screws

- Remove the 3.6mm screws with a Phillips Screwdriver.
- After removing the screws simply lift the logic board from the base.

Step 5 — Battery

- Simply lift the battery up and out of the base.
- Remove the cable.
- Replace the battery.

To reassemble your device, follow these instructions in reverse order.
