## INTRODUCTION

If the user wants to update the mapping system or gain more storage for their TomTom, replacing a full memory card will simply do the trick.

### TOOLS:

- [iFixit Opening Tools \(1\)](#)  
blue opening tool

## Step 1 — Memory Card

- Lay the device flat with the screen facing up and the rectangular Memory Card compartment cover visible.
- Wedge the plastic opening tool into a crease of the compartment cover and lift up.

*(i)* Our device does not have a Memory Card.

- Press gently on the memory card and it will pop out of the device.

To reassemble your device, follow these instructions in reverse order.
