INTRODUCTION

Fan replacement for this laptop is simple and only requires a screwdriver and a plastic opening tool.
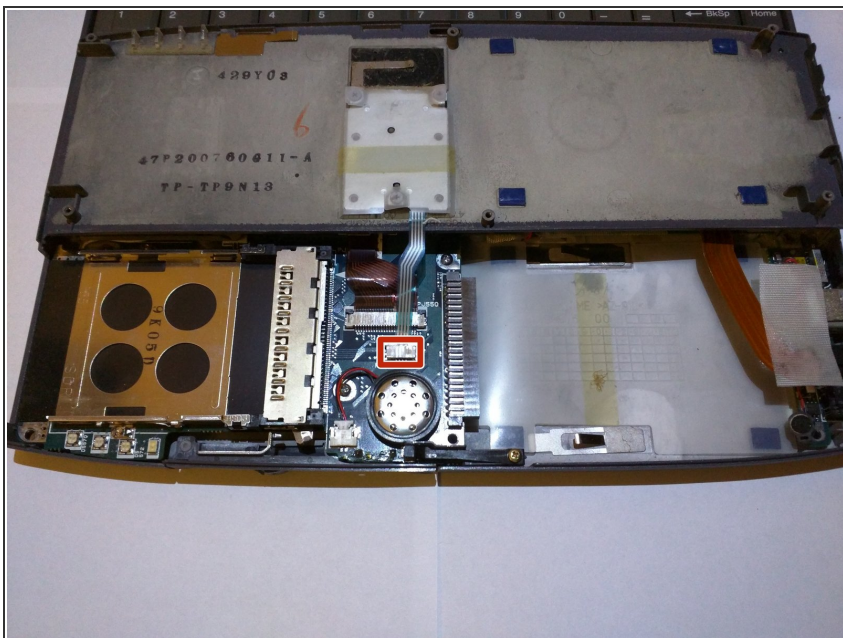

TOOLS:

- Phillips #0 Screwdriver (1)

Step 1 — Fan

- Begin by removing the battery and flipping the laptop over to see the screws

- Using a phillips head screwdriver to remove the screws that secure the back

Step 2

- Flip the laptop back over and open it up carefully

- Lift up the bottom panel where the mouse click buttons are

- ⚠️ Lift up slowly as simply flip it up and rest it on the keyboard as not to damage the ribbon cable connecting it

- Using the spudger disconnect the ribbon cable connected to the bottom of the panel

Step 3

- ● Using the same size phillips as before remove the two screws that hold the keyboard in place

- ● Then simply lift the keyboard up and slide it down and out

Step 4

- ● Remove this final screw and lift out the fan

To reassemble your device, follow these instructions in reverse order.
