INTRODUCTION

When the charger light won't turn on when plugged into a power source this means that the battery may need to be replaced. This guide will provide the proper instructions to replace it.

Step 1 — Battery

- Flip computer over to expose battery compartment.

Step 2

- Switch tab number one in direction of arrow.

Step 3

- Push tab two in the opposite direction and hold it, while simultaneously lifting battery out of compartment.

To reassemble your device, follow these instructions in reverse order.
