Step 1 — RAM

- Flip your device over so that you're facing the back cover of your device.

Step 2

- Use a Phillips #0 screwdriver to unscrew the single 8 mm screw and remove the RAM cover.

Step 3

- Using the iFixit opening tools, press on the two metal pieces holding the RAM cartridge in place. Do this for both RAM cards.

- (i) The card will pop up at an angle so you can remove it by hand.

Step 4

- Remove the RAM sticks from your device.

To reassemble your device, follow these instructions in reverse order.
