# INTRODUCTION

If your keys aren't working, then use this guide to help you replace the keyboard.

---

## TOOLS:

- [iFixit Opening Tools](#) (1)
  - [Spudger](#) (1)
  - [JIS #0 Screwdriver](#) (1)
-

## Step 1 — Battery

⚠ Turn off laptop before starting.

- Flip the switch on the right to the unlocked position.

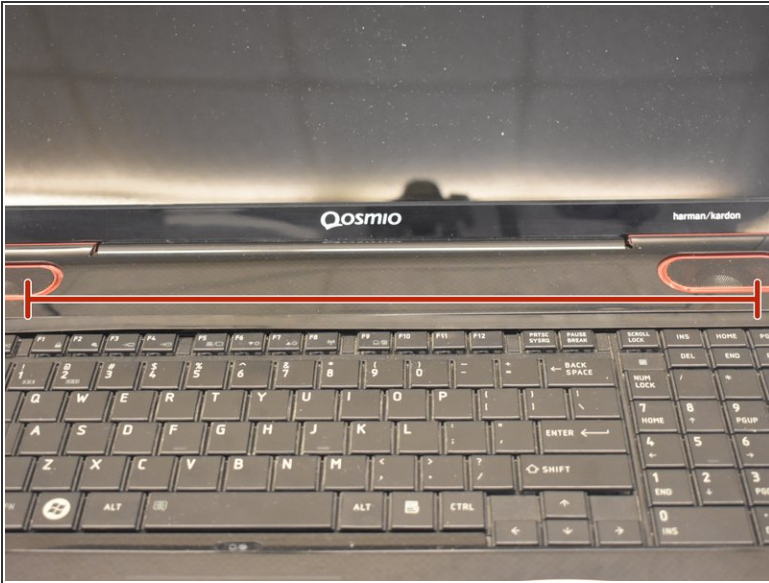

## Step 2

- Hold the switch on the left and pull the battery up towards you, using the marked tab, to take it out.

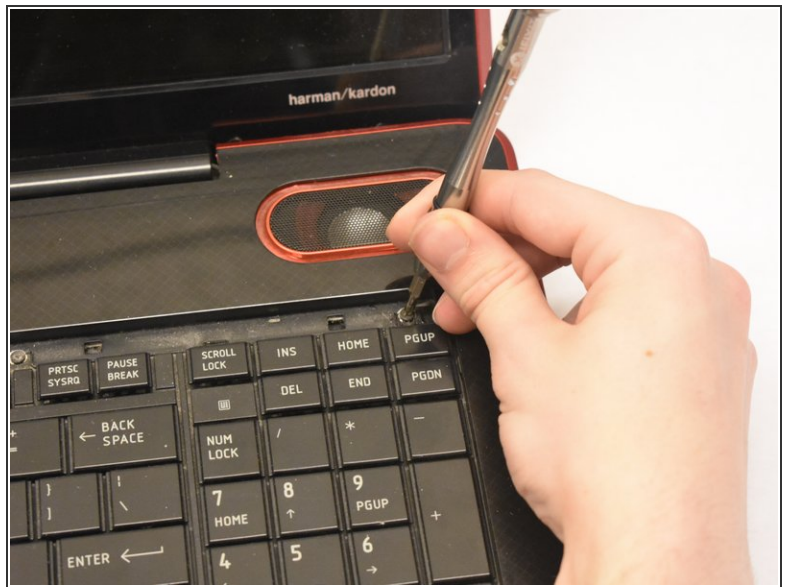

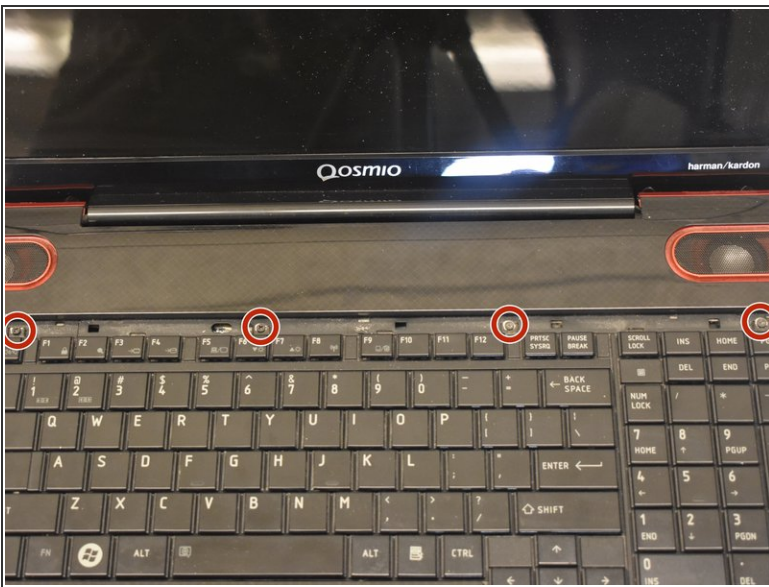

## Step 3 — Keyboard

- Locate the plastic bar at the top of the keyboard.
- Wedge a plastic opening tool under the bar and pop the bar out.

## Step 4

- Unscrew the four 3.6mm long JIS #0 screws using the JIS screwdriver.

## Step 5

- Lift the keyboard to get to the plastic ribbon underneath.
- Using the Spudger, press a small tab on the left side of the ribbon. Then pull the ribbon out from the casing.

To reassemble your device, follow these instructions in reverse order.
