Step 3 — RAM

- Use a JIS #0 screwdriver to remove the three 4.8mm long screws that secure the RAM cover.

- Lift the cover off using the indent for leverage.

Step 4

- Use a spudger or your fingers to push the RAM brackets outwards until the RAM pops up.

- Once the RAM stick is angled up, pull it out along the angle.

  ⓘ Repeat this step for the lower ram card.

To reassemble your device, follow these instructions in reverse order.
