INTRODUCTION

Replacing the optical drive in a Toshiba Satellite laptop should not be seen as difficult, but does involve opening one of the panels on the underside of the laptop.

🔧 TOOLS:

- Phillips #1 Screwdriver (1)

Step 1 — Battery

- Press down with your fingers while also applying a sliding motion on the latch buttons near the battery on the underside of your laptop.

Step 2
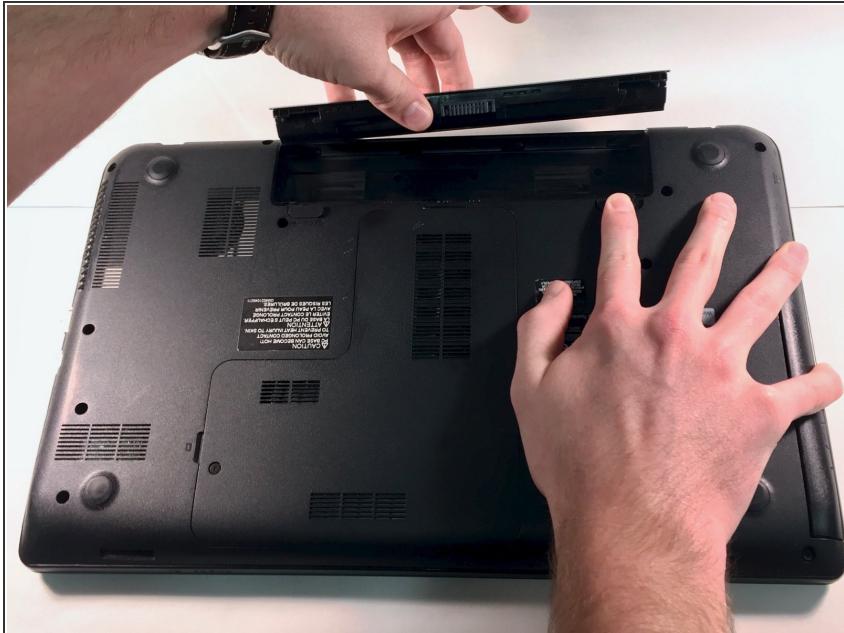

- Lift the battery upward with your fingers out of the battery compartment.

Step 3 — Optical Drive

- Place laptop with the bottom of it facing up.

- Remove the single 6mm Phillips #1 screw keeping the laptop panels in place.

Step 4
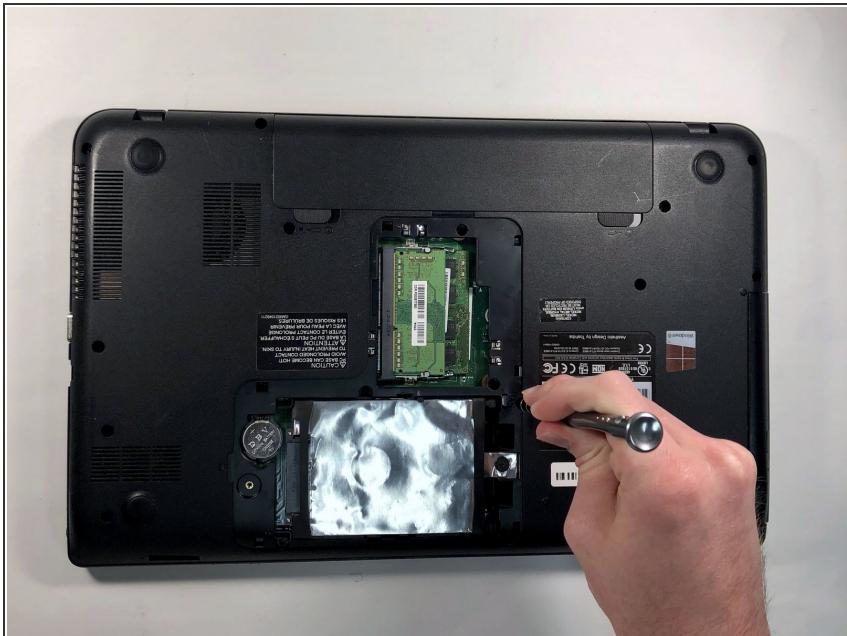

- Remove the 4mm Phillips #1 screw on the side of the now exposed area.
