Step 1 — Optical Drive

⚠️ Unplug the AC adapter and all other auxiliary components from the laptop
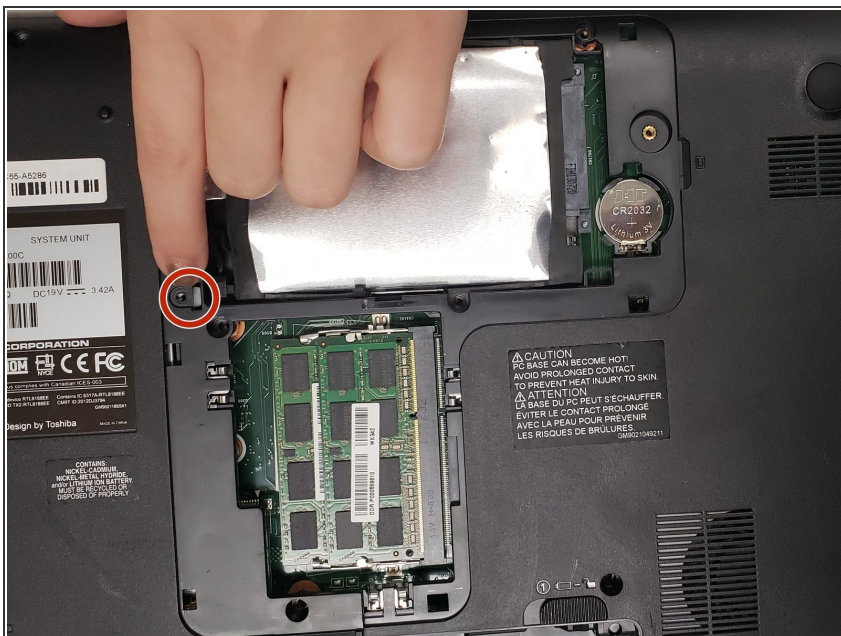

Step 2

- Unscrew the only screw (5 mm) that is holding on the removable back panel and remove the back panel.
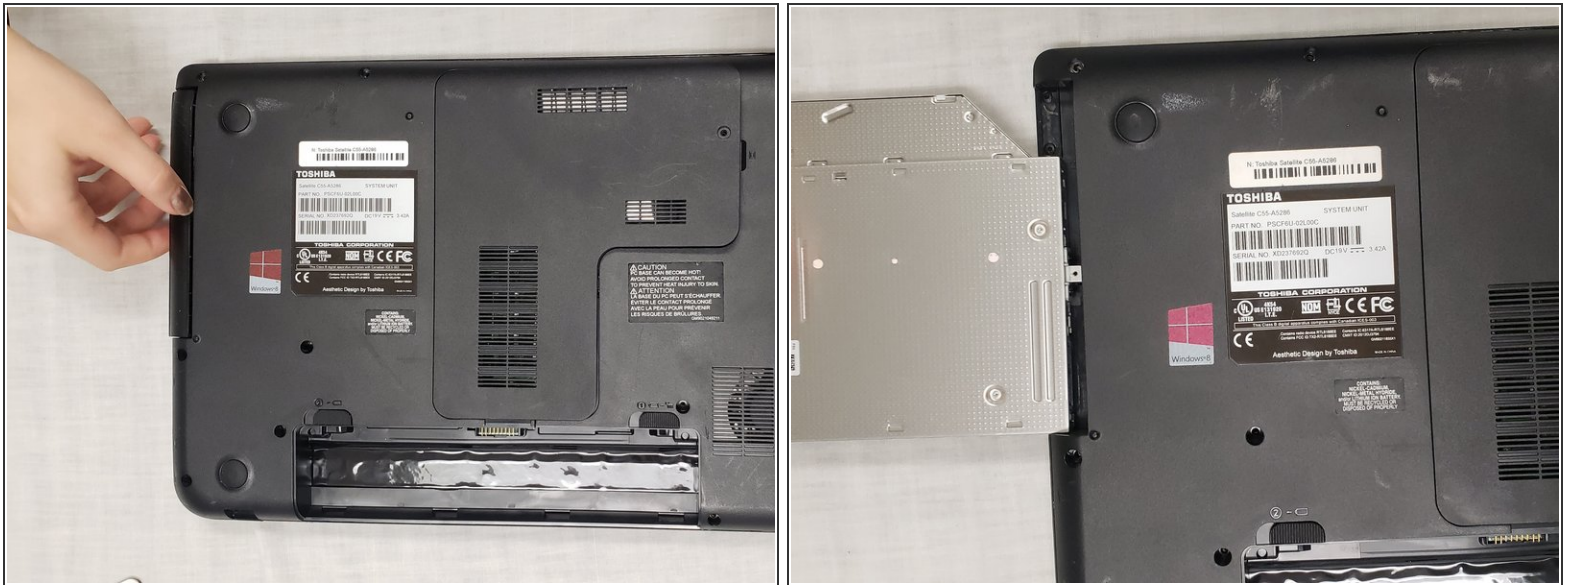

Step 3

● Remove the two 5-mm screws near the disk drive on the back panel. These two screws are above and below the manufacturer's sticker.

Step 4

● Under the back panel, remove the 4-mm screw holding the disk drive in place.

Step 5

- Carefully slide the optical drive out of its place in the laptop.

To reassemble your device, follow these instructions in reverse order.
