Step 1 — Battery

- Push the left tab with your left hand.

- Then push the right tab with your right hand.

- While your right hand is still pushing, remove the battery with your left hand.

Step 2 — Optical Drive

- Remove one screw with a JIS #000 screwdriver.

- (i) This screw does not come completely out, but you will still be able to get the panel off.

Step 3

- Use the plastic opening tool to pry open the back panel. Make sure to loosen all four sides then lift up.

Step 4

- Remove a .5mm screw with a JIS #000 screwdriver.
