

Toshiba Satellite C55-B5302 Battery Replacement

This guide will help you replace the battery on the Toshiba Satellite C55-B5302 laptop.

Written By: Jacob Mayes

INTRODUCTION

These are the steps for removing the battery from your Toshiba Satellite C55-B5302 laptop. Before starting, make sure you have your Phillips size #0 screwdriver and your laptop is not plugged in. If your battery is hot to the touch, wait until it has cooled down before removing it. Additionally, if the battery seems to be bulging or cracked, it should be disposed of properly and not reinserted into your laptop. The battery is easy to remove and will only take you a few minutes.

TOOLS:

- [Phillips #0 Screwdriver \(1\)](#)

Step 1 — Battery

- Flip laptop upside down so you can see the screws.

Step 2

- Using the Phillips #0 screwdriver, remove the two 7 mm screws from the back casing.

Step 3

- Pull the battery from the back of the laptop for removal from the laptop.

To reassemble your device, follow these instructions in reverse order.
