 **TOOLS:**

- **Phillips #0 Screwdriver** (1)
- **Metal Spudger** (1)

Step 1 — Keyboard

⚠ Unplug your computer, and make sure that it is shut off before starting

- Using the metal spudger, gently insert it under the plastic covering slowly easing it up until the screws are revealed.
- *(i)* The plastic covering will make clicking sounds when being removed this is normal, you are not breaking it.

Step 2

- Using a phillips head screwdriver, unscrew each of the four screws.

Step 3

- Gradually lift the keyboard up, it will reveal the connector cable.

 Do not pull the keyboard away too hard, this may damage the connector.

Step 4

- With the keyboard resting up, pull the tabs to disconnect the cable from the laptop.

To reassemble your device, follow these instructions in reverse order.
