 **TOOLS:**

- **Phillips #00 Screwdriver (1)**

Step 1 — Keyboard

- Open the laptop so the keyboard is facing you and the locate the thin plastic cover located directly above the keyboard.
- Using your fingers, remove this long piece of plastic gently.

⚠ Do not apply too much force when removing the cover piece as it can break.

Step 2

- Remove the two 4.8 mm type-0 Phillips head screws located underneath the plastic cover piece.

Step 3

- Starting at the top, gently raise the keyboard enough to remove it from the socket.

⚠ DO NOT pull out the keyboard after its out of its socket. The keyboard is connected to the hard drive through a data cable and removing forcefully could damage the cable and laptop.

Step 4

- Locate the data cable that is connected to the motherboard.
- Pull the white ZIF connector towards the screen to remove it.
- Pull the black ribbon cable away from the screen.

Step 5

- With the black ribbon cable now disconnected, remove the keyboard from its housing.

Step 6 — Hinge

- Close your laptop and flip it over.
- Remove the 13 screws circled in image 2.

Step 7

- Turn the laptop over and open the lid.
- Remove the keyboard(refer to [Toshiba Satellite L305-S5875 Keyboard Replacement](#) for steps on removing the keyboard)

Step 8

- Gently disconnect the ribbon cable.
- Gently disconnect the multicolored cable.

Step 9

- Gently pull the top case from the bottom case of the laptop.

Step 10

- Unscrew the two screws on the hinge. (Be careful to not damage nearby wires)
- *(i)* Both hinges shown, but replacing both may not be necessary.
- Congratulations, you may now remove and replace your hinge!
- Follow these steps in reverse order to reassemble your laptop.

To reassemble your device, follow these instructions in reverse order.
