🔧 TOOLS:

- Metal Spudger (1)
- Phillips #0 Screwdriver (1)

Step 1 — Keyboard

- Locate at the top of the key board a long thin plastic cover that extends from above the Del key to the top of the Esc button.
Step 2

- Pry up this plastic cover using the Spudger, and carefully remove the plastic cover from the laptop.

Step 3

- After putting the plastic cover to the side, locate the two screws holding the keyboard to the laptop.

- Remove the screws using the Phillips #0 screwdriver, and place the screws on the magnetic board.

Step 4

- Lift the keyboard up in order to remove the cable.

Step 5

- Notice the two white tabs on the compartment holding the cable.

- Carefully unplug the keyboard from the motherboard by pulling the two white tabs away from the compartment holding the wire.

To reassemble your device, follow these instructions in reverse order.
