INTRODUCTION

This guide is useful for replacing a broken keyboard on your Toshiba Satellite L455-S5975. In this replacement guide, you will remove the old keyboard and install the new one.
Note: Before starting any removal or installation, remember to turn off the device and to remove it from the power source.

🔧 TOOLS:

- iFixit Opening Tools (1)
- Phillips #00 Screwdriver (1)

Step 1 — Keyboard

ⓘ Before repairing your laptop, power down the system, disconnect the charger if necessary and remove the battery.

● Use the flat edge of the plastic opening tool to pry open the narrow plastic strip above the keyboard.
Step 2

● Remove the three 3mm screws with a Phillips#00 Screwdriver.

Step 3

- Lift the keyboard away from the top side of the laptop.

- ⚠ Do not pull the keyboard away too hard. It is still connected by the fragile ribbon cable (shown in the red square).

Step 4

- Disconnect the keyboard cable that is still attached to the keyboard.

- Unlatch the fastener.

- Using your hands, pull the keyboard connector out, not up.
