

# Toshiba Satellite L55t-B5271 Back Panel Replacement

Back panel disassembly of a Toshiba Satellite L55T-B5271.

Written By: Garrett Garofalo

## INTRODUCTION

This guide will help you remove the back panel of your device. No special skills are required, but you do need to know how to use a Phillips #00 screwdriver.

---

### TOOLS:

- [Phillips #00 Screwdriver](#) (1)
  - [Heavy-Duty Spudger](#) (1)
  - [Anti-Static Wrist Strap](#) (1)
  - [iFixit Opening Tools](#) (1)
-

## Step 1 — Battery

**i** Make sure you turn the laptop off first.

- Close the laptop lid and flip it over so that Toshiba logo is facing down.

## Step 2

- Remove the two 6.5 mm Phillips head screws indicated using a Phillips #00 screw driver.

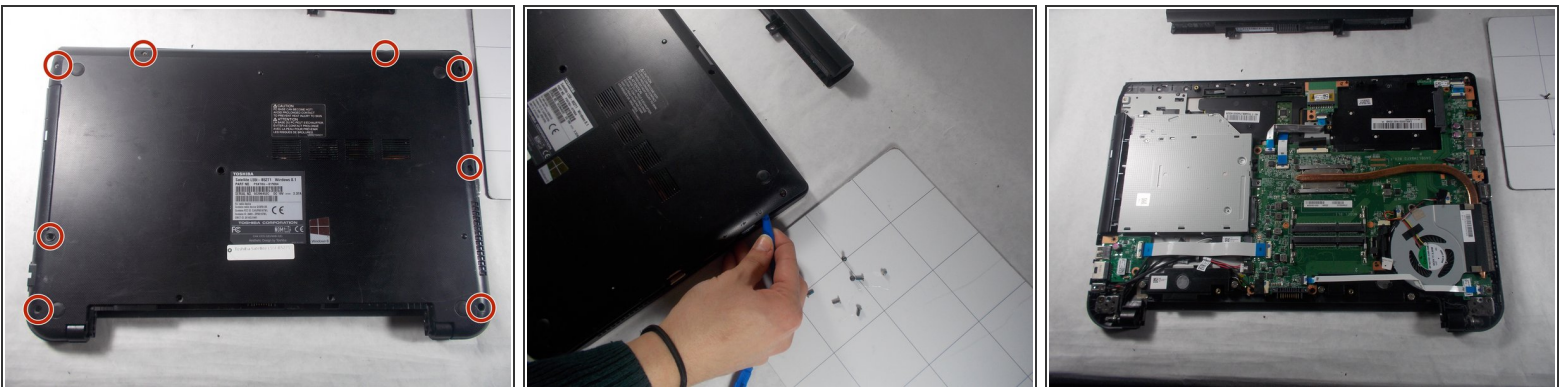

### Step 3

- Once the screws are removed, slide the battery pack out of the computer.

### Step 4 — Back Panel

- Remove all 6.5 mm Philips head screws on the back cover of the laptop with a Philips #00 screwdriver.
  - Use the plastic opening tool to remove the back cover from the laptop.
- ⚠ Be aware that static discharge can cause damage to sensitive electrical components within the computer. To avoid this you can wear an anti-static wrist strap.

To reassemble your device, follow these instructions in reverse order.
