Step 1 — Battery

- Make sure the laptop is unplugged and powered off.

- Locate the battery latches on the underside of the laptop.

Step 2

- Slide the right latch to the right until you hear it lock into place.

- Slide the left latch to the left and hold it.

Step 6

- Use another prying tool to pry up along the edges of the cover. Continue prying up around the edges until the cover is open and remove it.

Step 7

- Push the two top tabs outwards and the top stick of RAM will pop up. Gently remove the stick of RAM by pulling it out.
