INTRODUCTION

The keyboard key replacement is fairly straightforward. Don't be afraid of pulling too hard on the key since the underlying components are very durable.

🔧 **TOOLS:**

- iFixit Opening Tools (1)

Step 1 — Keyboard Key
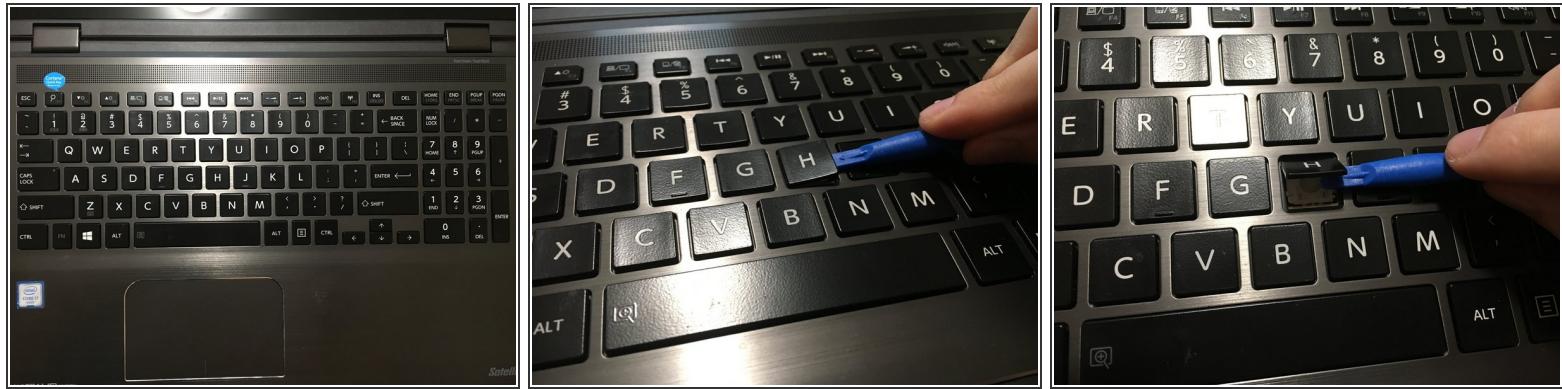

- Open up the laptop to expose the key you are trying to replace.

- Insert the opening tool underneath the key to pry it off.

- (i) Do not worry about using too much force - the key should pop off from the bottom or the top.

- When the key pops off, remove from board.

To reassemble your device, follow these instructions in reverse order.
