## INTRODUCTION

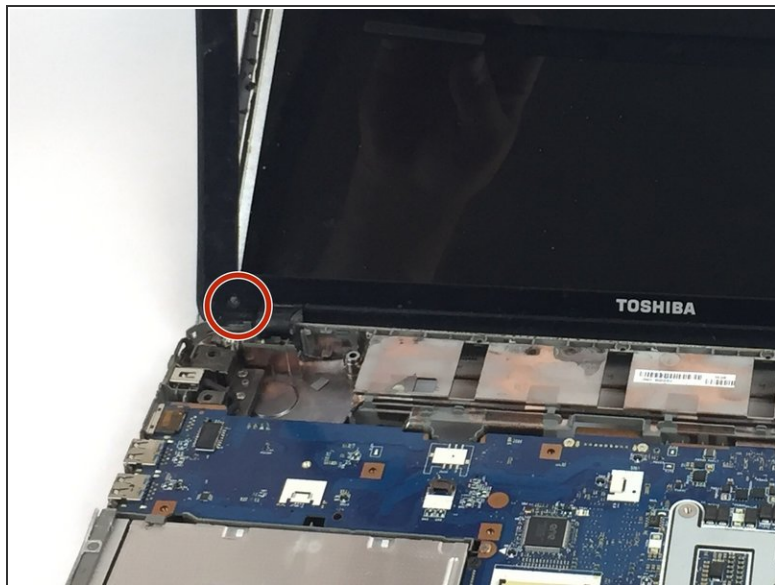

The laptop screen, most of which are made of glass, is the physical surface on which visual information is presented. Sometimes screens can become faulty or can become damaged from an accident. Luckily, laptop screens are replaceable and below are the instructions to do it on your own.

---

### TOOLS:

- [Phillips #0 Screwdriver](#) (1)
  - [iFixit Opening Tools](#) (1)
-

## Step 1 — Laptop Screen

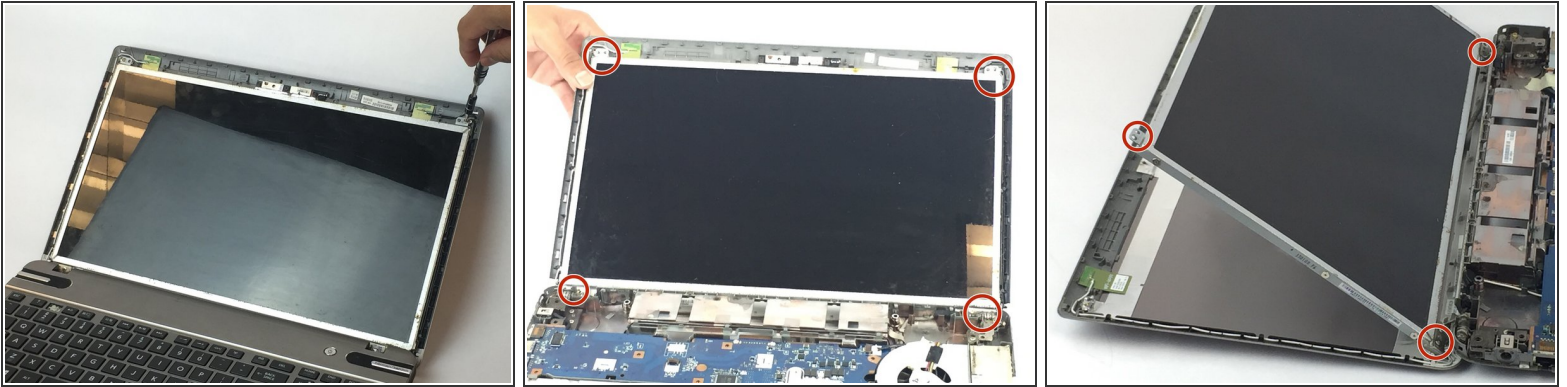

- Remove the two F3 screws on the bottom part of the screen.

## Step 2

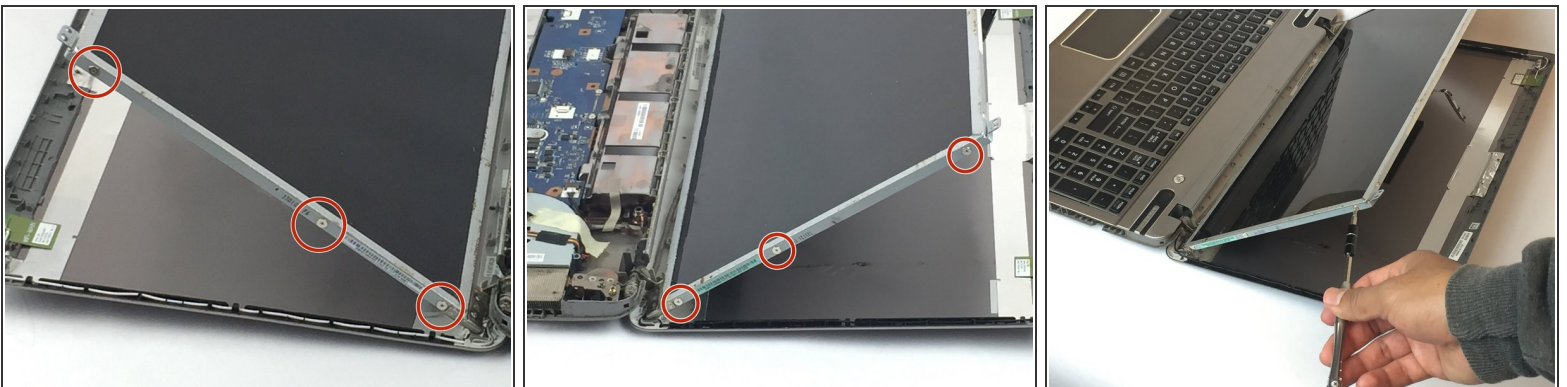

- Using a plastic opening tool, carefully pry open the border of the screen away from the screen until the border is completely off.

## Step 3

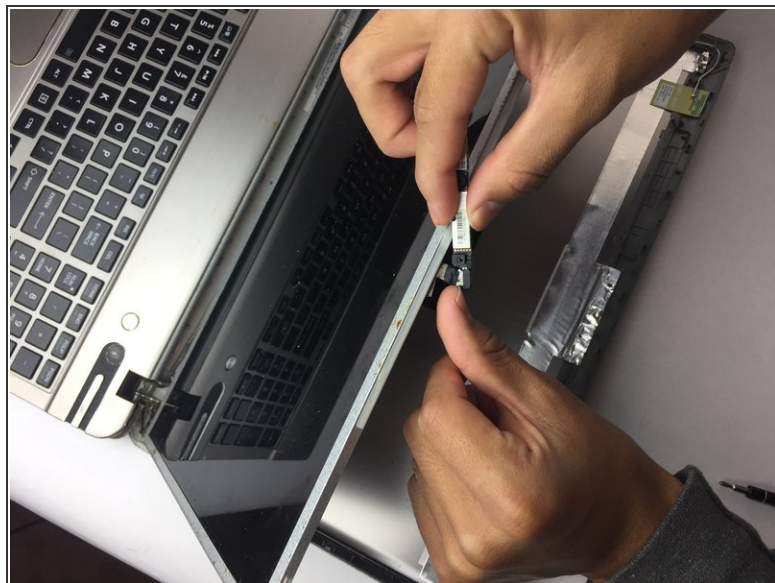

- Using the Phillips 001, carefully remove each F3 screw on each corner of the screen.

## Step 4

- Using the Phillips 012, remove the three F2 screws on each side of the screen.

## Step 5

- Carefully lift up the screen for an easier removal of the webcam. Then gently remove the connector by sliding it out of the webcam.

## Step 6

- Remove the tape holding the sliding connector and gently pull it out.

To reassemble your device, follow these instructions in reverse order.
