## INTRODUCTION

This guide shows how to safely and properly remove the battery for the Toshiba Satellite P855-S5312. This guide is required for all steps for safety. No tools are required or this step.

## Step 1 — Battery

- Turn laptop upside down with the spine facing towards you and locate the two tabs on the top of the back panel.
- Move the sliders to the left and right to release the tabs holding the battery in.
- While the tabs are pushed outwards, remove the battery from the device.

To reassemble your device, follow these instructions in reverse order.
