 **TOOLS:**

- **Tweezers** (1)
- **Phillips #1 Screwdriver** (1)

## Step 1 — Display

- Use tweezers to remove the small rubber covers over the screws on the top and bottom of the laptop case.

## Step 2

- Use a #1 Phillips screwdriver to remove the 3mm screws located on both sides of the top of the laptop as well as the lower corners.

## Step 3

- Use a plastic opening tool to separate the front plastic panel from the back side of the top of the laptop.
- Carefully pull the top away from the back.

## Step 4

- Turn the laptop around.
- Remove the webcam/microphone data cable.

## Step 5

- Remove the lower lighting power supply.
- Remove the signal light power supply and data cable.

## Step 6

- Locate and remove the four 2mm #1 Phillips screws around the sidewalls of the display.

**⚠** After removing the last screw, the screen will be very loose, be sure to keep a hand on it to prevent it from damaging the keyboard.

## Step 7

- Carefully remove the screen from the side brackets.
- Remove the LCD ribbon connector from the display.

To reassemble your device, follow these instructions in reverse order.
