Step 1 — RAM

- Remove the 9 rubber gripper pads on the back panel of the laptop using tweezers.

Step 2

- Unscrew nine 5.8 mm screws by turning a PH1 screwdriver clockwise after inserting it into the screw.

- Unscrew two 6.8 mm screws by turning a PH1 screwdriver clockwise after inserting it into the screw.

Step 4

- Gently pinch the RAM with your thumb and pointer finger.

- Pull the RAM out of the logic board with gentle force.

⚠️ Try to keep the RAM parallel as you pull it out, so that the RAM does not chip.

To reassemble your device, follow these instructions in reverse order.
