

# Toshiba Satellite p875 s7200 Speaker Replacement

Guide for replacing the speakers on a Toshiba Satellite p875 s7200.

Written By: Danny Amado

## INTRODUCTION

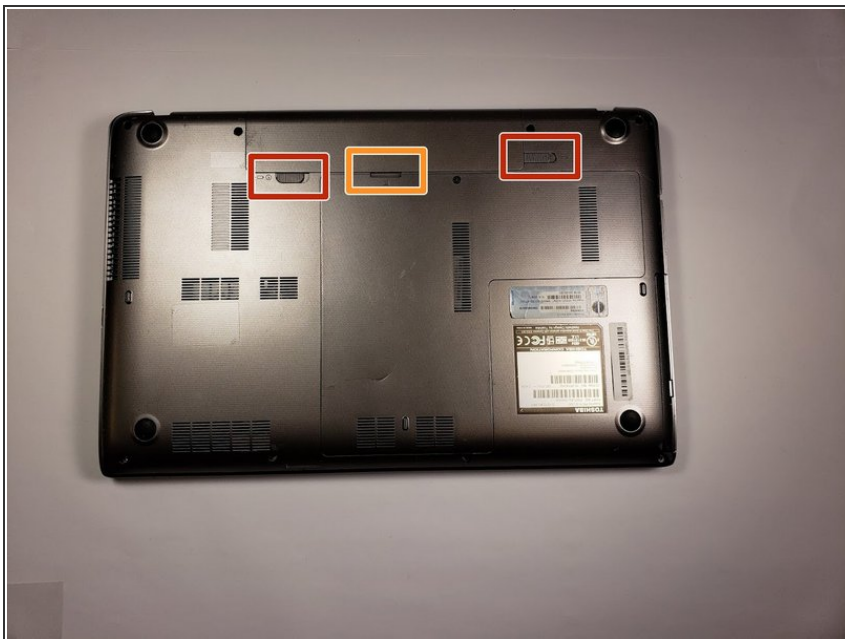

If you need to replace the speakers, follow this guide. The speaker can be accessed by removing the computer from its casing. To replace this part, you will need a Phillips 0 screw driver and a plastic opening tool.

### TOOLS:

- [Phillips #0 Screwdriver](#) (1)
  - [iFixit Opening Tools](#) (1)
-

## Step 1 — Speaker

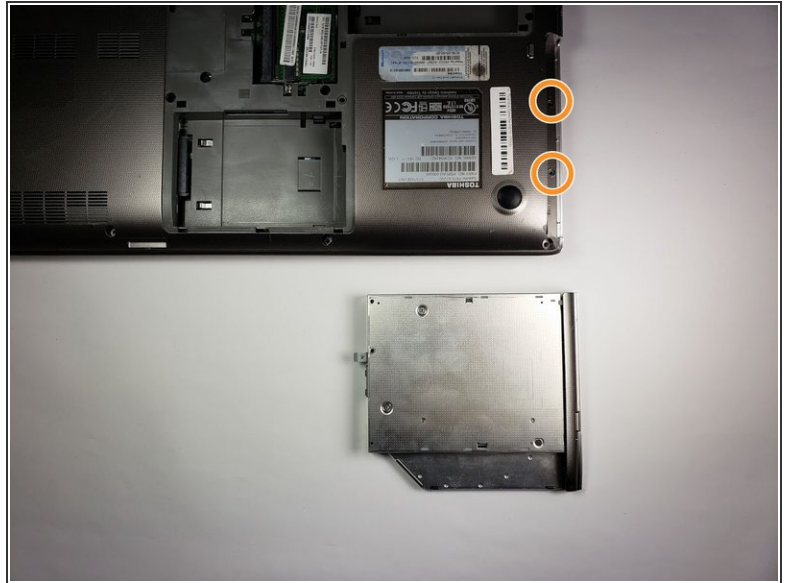

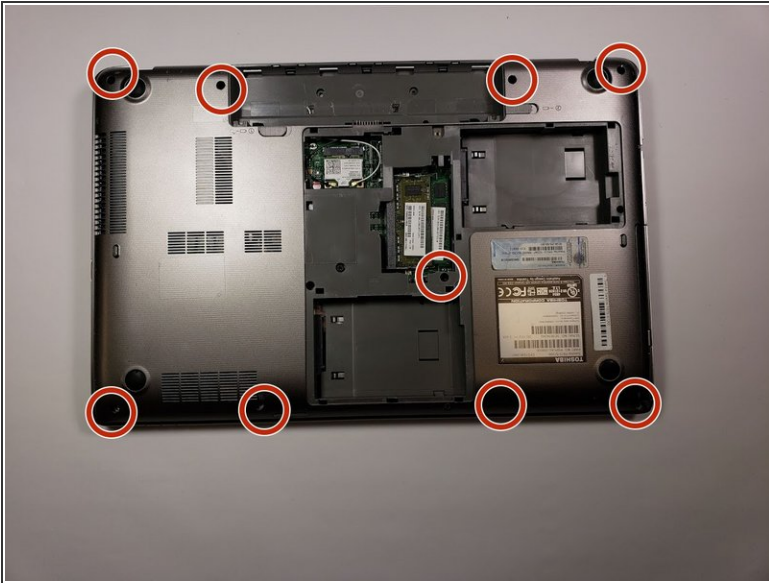

- Remove the battery by sliding the tabs to the left.
- Use the spudger to lift the battery out.

## Step 2

- Use the Phillips head screw driver to remove the screw holding the back plate on.
- Use the spudger to remove the back plate.

### Step 3

- Remove the 6 mm screws around the edges with the Phillips head screw driver. Then remove the 6mm screw holding the disc drive into place.
- Sliding out the disc drive will reveal the final two 4 mm screws on the bottom of the device.

### Step 4

- Flip the laptop over to begin the process of removing the keyboard.
- Use the spudger to pop the keyboard off. Start at the bottom of the keyboard and work your way around.

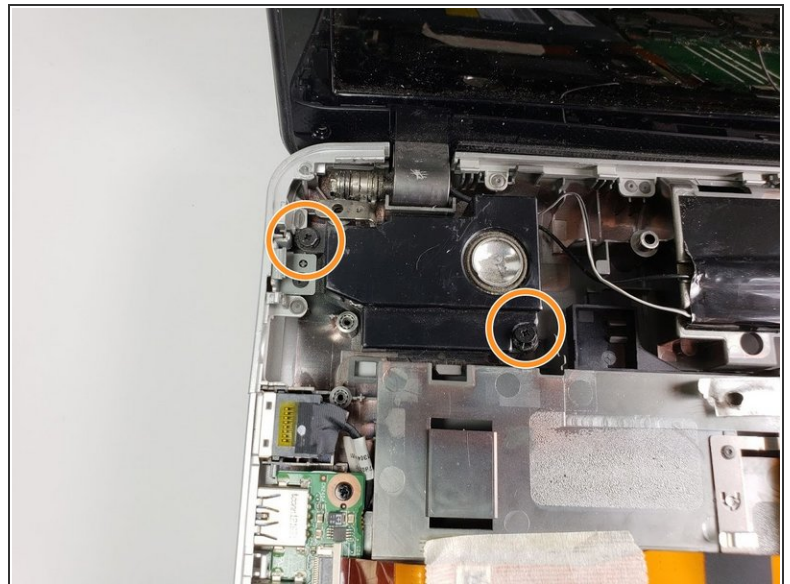

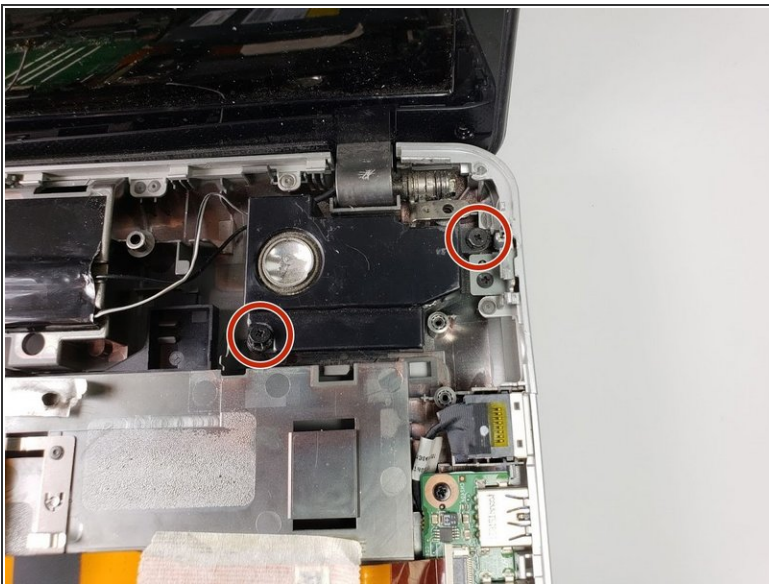

## Step 5

- Use the Phillips head screw driver to remove the last 6mm screws holding the case together.
- ⚠ The screws are held into elevated columns which are fairly easy to break. Be cautious when removing the screws.
- After removing the keyboard and the screws, use the spudger around the edges of the laptop to remove the face plate.

## Step 6

- Use the Phillips head screwdriver to remove the 5mm screws on the right speaker.
- Repeat the process for the left side.

To reassemble your device, follow these instructions in reverse order.
