

# Tt Esports Poseidon Z KB-PIZ-KLBLUS-06

## Teardown

Removal down to the motherboard of Poseidon keyboard.

Written By: Timothy

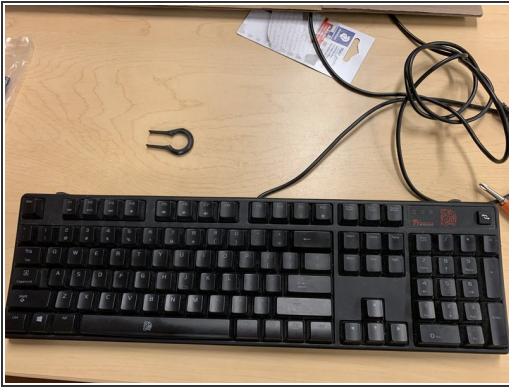

## TOOLS:

- [Phillips #0 Screwdriver](#) (1)
- [keycap removal too](#) (1)

## Step 1 — Remove Keys

- Use the key cap remover to pry off keys from keyboard
- ⓘ Insert firmly to hear click and pull straight out of keyboard

## Step 2

- The space, +, enter, shift, insert, and backspace keys all have metal parts which increase removal difficulty
- Tilt key up to disengage the metal latch

### Step 3 — Back Panel

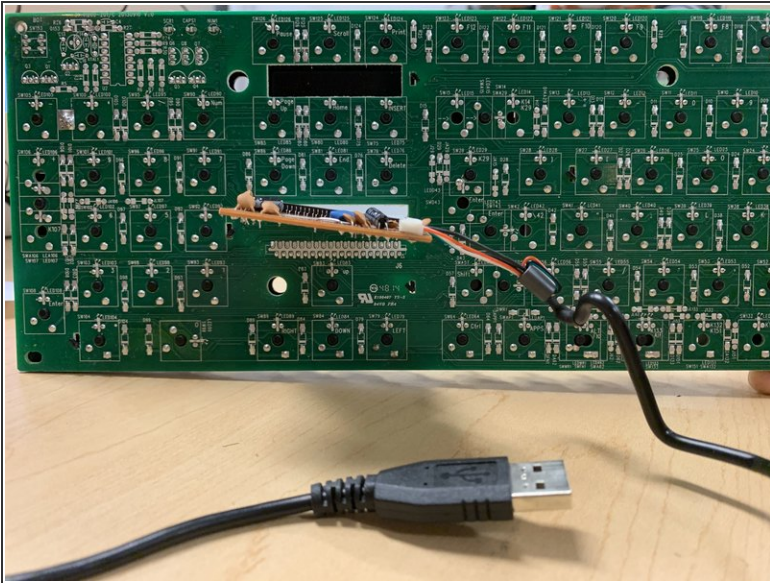

- Flip keyboard over
- Use standard Philips screwdriver to remove the three back screws from casing

### Step 4

- Unclip the two halves of the keyboard case by prying at the following points
- ❗ Need to disengage the plastic tabs holding the two sides of the casing together

## Step 5 — Motherboard

- Expose the motherboard and internal keys
